FOR INTERNAL DISTRIBUTION-CDL Bi-Monthly Roundtable

Please register for CDL Bi-Monthly Roundtable on Aug 1, 2017 2:00 PM EDT at:

<https://attendee.gotowebinar.com/register/8456783017539432194>

You MUST register using the above link. The call-in information will be emailed to you after you register for the August 1st Roundtable.

Hello,
Please join us for our next FMCSA CDL Roundtable. To ensure our roundtable is valuable for our participants, the FMCSA CDL Division is requesting that you submit agenda items, questions, topics, and ideas that you would like discussed. Please submit them as soon as possible to allow the CDL Division sufficient time to prepare a response. Items should be sent to: CDLcompliance@dot.gov

The purpose of the call is to discuss topics on relevant issues that affect our State Partners, and FMCSA Divisions and Service Centers as it relates to the Federal Motor Carrier Safety Regulations and Commercial Driver Licensing.

As a reminder, the calls are **2:00-3:30 pm ET**.

Should you have any questions or concerns, please send your requests to: CDLcompliance@dot.gov

After registering, you will receive a confirmation email containing information about joining the webinar.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks
Gary

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks
Gary

Gary,

Med Cert information is fine.

Just one thing which might just be a data set up issue, a permit is valid for 6 months, there are no validations though , but wanted to bring this to your notice:

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks

Med Cert information is fine.

Just one thing which might just be a data set up issue, a permit is valid for 6 months, there are no validations though , but wanted to bring this to your notice:

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Gary,

I was expecting # D2 in error "DUPLICATE CONVICTION", but received '9999 99TE CONVICTION'.

Can you please look.

Thanks,

NMVTIS Participants:

We are pleased to announce that Minnesota is confirmed to implement as a Fully Integrated Online state via NMVTIS Web Services on Sunday, July 23rd, 2017 . Minnesota is currently participating in NMVTIS as a batch state. You will need to update your UNI Site Table and ensure **MN** is set up for application id '**22**' with a jurisdiction subsystem code of '**1**'. UNI will need to be restarted after you have made this change. Please refer to the attached document for instructions on how to make changes to the UNI site table. Please let us know if you have any questions.

States participating in batch mode and responding to unsolicited messages would need to update their UNI Site Table and ensure **MN** is setup for application id '**22**' with a jurisdiction subsystem code of '**1**'. States participating in batch mode and not responding to unsolicited messages do not need to make any UNI changes.

If you have any questions, please contact the AAMVA Operations Department at 1888-226-8280 option 1 or Helpdesk@aamva.org.

Set up a subscriber in UNI site table

- 1. Go to Edit/Subscriber/Site Table
- 2. Check if the site is already in the site table by entering site ID in the field Site Name on the first line. In the screen print below we are using AA.

Edit		View	Tools	Admin	Help
Action		Delete	Site Name	Site Net Name	X Ref
 Edit		Delete	AA	AAMVAnet	000
 Edit		Delete	AA1	AA Bridge	000

- 3. If it doesn't show up, then you will need to add it by clicking on the plus sign on that screen.

8. Select the role for the application that this site needs to be setup for. Also make sure that NCS is checked for the Network Service Code. If you have made a change, be sure to click update.
9. The data is now saved to the database, but in order for the change to take place for a UNI that is currently running, go to tools/Utilities/Configuration Update/Windows Services. A pop up screen will show the update status that have been applied to the services.

Attachments: UNI Setup for Site ID_20170714113952.docx

Importance: High

NMVTIS Participants:

We are pleased to announce that Minnesota is confirmed to implement as a Fully Integrated Online state via NMVTIS Web Services on Sunday, July 23rd, 2017 . Minnesota is currently participating in NMVTIS as a batch state. You will need to update your UNI Site Table and ensure **MN** is set up for application id '**22**' with a jurisdiction subsystem code of '**1**'. UNI will need to be restarted after you have made this change. Please refer to the attached document for instructions on how to make changes to the UNI site table. Please let us know if you have any questions.

States participating in batch mode and responding to unsolicited messages would need to update their UNI Site Table and ensure **MN** is setup for application id '**22**' with a jurisdiction subsystem code of '**1**'. States participating in batch mode and not responding to unsolicited messages do not need to make any UNI changes.

If you have any questions, please contact the AAMVA Operations Department at 1888-226-8280 option 1 or Helpdesk@aamva.org.

Set up a subscriber in UNI site table

- 1. Go to Edit/Subscriber/Site Table
- 2. Check if the site is already in the site table by entering site ID in the field Site Name on the first line. In the screen print below we are using AA.

Edit		View	Tools	Admin	Help
Action		Delete	Site Name	Site Net Name	X Ref
			aa		
Edit		Delete	AA	AAMVAnet	000
Edit		Delete	AA1	AA Bridge	000

- 3. If it doesn't show up, then you will need to add it by clicking on the plus sign on that screen.

Edit		View	Tools	Admin	Help
Action		Delete	Site Name	Site Net Name	X Ref
			aa		
Edit		Delete	AA	AAMVAnet	000
Edit		Delete	AA1	AA Bridge	000

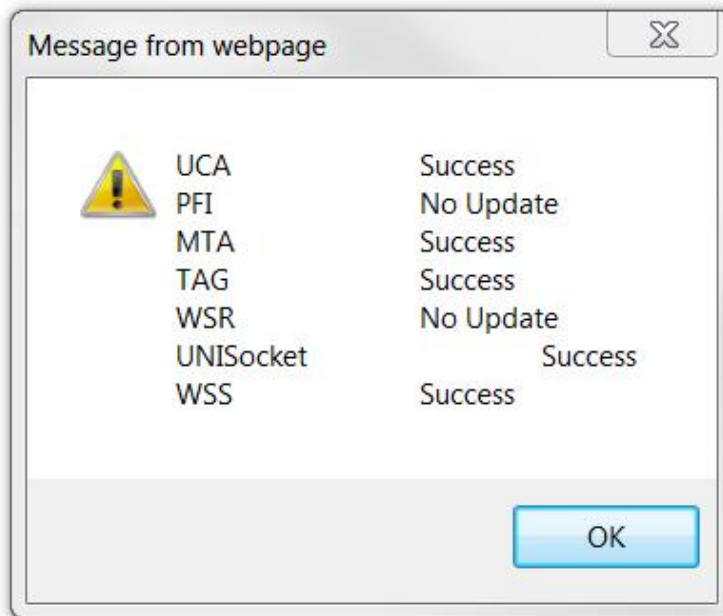

- 4. That will give you a line that you can enter the data in

Action		Delete	Site Name	Site Net Name	X Ref
			aa		
	Update Cancel				
Edit		Delete	AA	AAMVAnet	000
Edit		Delete	AA1	AA Bridge	000

- 5. Enter site ID, site net name (14 characters max), put 000 in the xref number, and then click update.
- 6. The name entry is now entered in the database, now you need to setup the application and role that the site will be using. Expand the new site.
- 7. You will see the applications (if there are any) that have been selected. If you are using CIDLIS change the subsystem code for 02-CIDLIS to 8-STATES.

Gary,

Med Cert information is fine.

Just one thing which might just be a data set up issue, a permit is valid for 6 months, there are no validations though , but wanted to bring this to your notice:

DDLPEID	DRV LIC PERMIT EXPIRATION DATE	1	20190626
DDLPIID	DRV LIC PERMIT ISSUE DATE	1	20170626

That sure is an oddball. This will take another hour minimum. I'll let you know if it takes longer.

Also, did you send out the meeting notice yet for Monday? I have not received it.

Gary,

On # C13, the ST/DLN on the HC & H6 message is sent as :

Application	Message Type	Trans Origin	Origin
2	HC	P6	AI

 **Message (AMIE)**

Action	Block	01-10	11-20	21-30	31-40

That sure is an oddball. This will take another hour minimum. I'll let you know if it takes longer.

Also, did you send out the meeting notice yet for Monday? I have not received it.

Gary,

On # C13, the ST/DLN on the HC & H6 message is sent as :

Application	Message Type	Trans Origin	Origin
2	HC	P6	AI

Message (AMIE)					
Action	Block	01-10	11-20	21-30	31-40
Edit		0110101020	0000000000	0030417000	0192122000

Shouldn't it be 'AI7685483' instead of 'P37685483'?

Can you please look.

Gary,

Med Cert information is fine.

Just one thing which might just be a data set up issue, a permit is valid for 6 months, there are no validations though , but wanted to bring this to your notice:

That sure is an oddball. This will take another hour minimum. I'll let you know if it takes longer.

Also, did you send out the meeting notice yet for Monday? I have not received it.

Gary,

On # C13, the ST/DLN on the HC & H6 message is sent as :

Application	Message Type	Trans Origin	Origin
2	HC	P6	AI

Message (AMIE)

Action	Block	01-10	11-20	21-30	31-40
Edit		0110101020	0000000000	0030417000	0192122000

Gary,

Med Cert information is fine.

Just one thing which might just be a data set up issue, a permit is valid for 6 months, there are no validations though , but wanted to bring this to your notice:

I have resolved the problem, but unfortunately the fix was associated with the CSOR process so we'll need to run C11 again. I have removed the conviction/withdrawal/accident info and have deleted the pointer.

Let me know when you are ready for the UD.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks
Gary

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks
Gary

Siri, we left off at D2 and can continue when you're ready.

We also have not finished Driver C. I believe we left off at C12 if you'd rather pick up from there.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks

Siri, we left off at D2 and can continue when you're ready.

We also have not finished Driver C. I believe we left off at C12 if you'd rather pick up from there.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks

Siri, we left off at D2 and can continue when you're ready.

We also have not finished Driver C. I believe we left off at C12 if you'd rather pick up from there.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks

Gary,

Med Cert information is fine.

Just one thing which might just be a data set up issue, a permit is valid for 6 months, there are no validations though , but wanted to bring this to your notice:

DDLPEID	DRV LIC PERMIT EXPIRATION DATE	1	20190626
DDLPID	DRV LIC PERMIT ISSUE DATE	1	20170626

Can you please look.

Thanks,
Asma

Shouldn't it be 'AI7685483' instead of 'P37685483'?

Can you please look.

Gary,

Med Cert information is fine.

Just one thing which might just be a data set up issue, a permit is valid for 6 months, there are no validations though , but wanted to bring this to your notice:

DDLPEID	DRV LIC PERMIT EXPIRATION DATE	1	20190626
DDLPID	DRV LIC PERMIT ISSUE DATE	1	20170626

I have resolved the problem, but unfortunately the fix was associated with the CSOR process so we'll need to run C11 again. I have removed the conviction/withdrawal/accident info and have deleted the pointer.

Let me know when you are ready for the UD.

Med Cert information is fine.

Just one thing which might just be a data set up issue, a permit is valid for 6 months, there are no validations though , but wanted to bring this to your notice:

Gary,

The D31 conviction on the H3 message indicates that the Jurisdiction Code Convicting is "AI", the H3 message that was sent as part of the CSOR was sent with Jurisdiction Code Convicting as "P2" for D31 conviction.

Can you please look.

Siri, we left off at D2 and can continue when you're ready.

We also have not finished Driver C. I believe we left off at C12 if you'd rather pick up from there.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks
Gary

FOR IMMEDIATE RELEASE

Georgia Dealer and Title Clerk Sentenced in Odometer Fraud Scheme

Two Georgia residents were sentenced in Atlanta, Georgia today for their roles in a conspiracy to alter odometers of used motor vehicles, the Justice Department announced.

Rojen Burnett, 35, of Conyers, Georgia, and Amber McLaughlin, 33, of Duluth, Georgia, each were sentenced to 12 months in prison and three years of supervised release by Chief U.S. District Court Judge Thomas W. Thrash, Jr.

Burnett owned and operated Lifestyle Auto Broker LLC, a Georgia corporation that bought and sold used motor vehicles; McLaughlin was a former customer service specialist at the Motor Vehicle Department of the Georgia Department of Revenue. In 2012 and 2013, Burnett bought high-mileage used motor vehicles, altered the mileage on the titles, rolled-back the odometers, obtained new titles with false low mileages, and sold the vehicles to unsuspecting dealers. The dealers, in turn, sold them to consumers. McLaughlin helped Burnett commit odometer fraud by fraudulently issuing new Georgia titles with false low mileages in exchange for cash.

"Buying a car or truck is one of the biggest financial decisions that consumers make," said Acting Assistant Attorney General Chad A. Readler of the Justice Department's Civil Division. "Odometer fraudsters victimize consumers by making them pay substantially more for a used car that is less safe and less reliable than the consumer wanted or needed. The Justice Department will hold these fraudsters accountable for their crimes."

The defendants' scheme included at least 310 vehicles whose odometers were rolled back and sold. Burnett and McLaughlin were also ordered to pay \$399,363 and \$176,725, respectively, in restitution to the victims of their fraud, who are the current owners of the cars with rolled-back odometers.

Gary,

On # C13, the ST/DLN on the HC & H6 message is sent as :

Application	Message Type	Trans Origin	Origin
2	HC	P6	AI

Message (AMIE)

Action	Block	01-10	11-20	21-30	31-40
Edit		0110101020	0000000000	0030417000	0192122000

Shouldn't it be 'AI7685483' instead of 'P37685483'

Can you please look.

Thanks,

Gary,

Med Cert information is fine.

Just one thing which might just be a data set up issue, a permit is valid for 6 months, there are no validations though , but wanted to bring this to your notice:

Importance: High

****If your jurisdiction has a (Vehicle or DL/ID document update, theft or has experienced missing/stolen materials, etc.), please make sure to submit the alert/notice to: dhanchulak@aamva.org for posting to the AAMVA Document Updates and Fraudulent Activities Alert site!**

The information disseminated is intended to raise the awareness of front line counter employees on the use of fraudulent travel and identity documents such as passports, driver licenses, visas, Social Security cards, vehicle titles, vehicle registrations and employment authorization cards which employees may encounter in the licensing process.

Managers and directors are encouraged to update and inform employees on those alerts pertaining to their daily job duties at the beginning of each shift. In the event employees encounter fraudulent documents in the driver's license issuance process, they should follow their jurisdiction's policies and procedures regarding such documents.

I look forward to receiving your jurisdictions' notifications!

Hi Asma

I'm ready to continue. I believe we still have C15 to do and left off at D4, which ever you want to begin with.

Gary,

The D31 conviction on the H3 message indicates that the Jurisdiction Code Convicting is "AI" , the H3 message that was sent as part of the CSOR was sent with Jurisdiction Code Convicting as "P2" for D31 conviction.

Can you please look.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks
Gary

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks

Hi Asma,

I believe the Driver C CSOR problems from yesterday are resolved. I have deleted the pointer and am ready to issue the UD again for test C11. Let me know when you are ready.

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

This time it appears the CSOR succeeded. I see the convictions, withdrawals and accident have been saved. CC has been sent and CE received.

I would like to run the CSOR first to be sure it doesn't have further problems. And then if possible, I'd like to go back to Driver D since those tests also deal with error processing. I could then address all of the issues at once.

Gary,

I was going through # C12 that was sent yesterday, I see that the error message, and Processing Status are being populated correctly, but, the HB message in error is not as per the SPEXS Specification.

Do you want to try the CSOR and come back and fix #C12 later ? Please let me know.

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Gary,

The D31 conviction on the H3 message indicates that the Jurisdiction Code Convicting is "AI" , the H3 message that was sent as part of the CSOR was sent with Jurisdiction Code Convicting as "P2" for D31 conviction.

Gary,

I was going through # C12 that was sent yesterday, I see that the error message, and Processing Status are being populated correctly, but, the HB message in error is not as per the SPEXS Specification.

Do you want to try the CSOR and come back and fix #C12 later ? Please let me know.

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Gary,

I still see that the Jurisdiction Code Conviction on the H3 message for ACD Code D31 is 'AI'.

During the CSOR, the D31 Conviction on H3 message was sent with Jurisdiction Code Conviction as 'P2'.

H3 sent during CSOR :

DCICHI	CITATION CDL HOLDER INDICATOR	1	1
DCIDCI	CITATION DATE	1	20150909
DCVCOM	CONVICTION COMMERCIAL VEH INCL	1	1
DCVCRT	CONVICTION COURT TYPE	1	CIR

Gary,

I was going through # C12 that was sent yesterday, I see that the error message, and Processing Status are being populated correctly, but, the HB message in error is not as per the SPEXS Specification.

Do you want to try the CSOR and come back and fix #C12 later ? Please let me know.

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Gary,

I still see that the Jurisdiction Code Conviction on the H3 message for ACD Code D31 is 'AI'.

During the CSOR, the D31 Conviction on H3 message was sent with Jurisdiction Code Conviction as 'P2'.

H3 sent during CSOR :

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Good Morning Gary,

I think since the issue is fixed, we can complete Driver C and then move on to Driver D. I sent C12 and it looked good, please go ahead with completing the CSOR by sending the CC message for C11.

Thank you,
Siri.

Siri, we left off at D2 and can continue when you're ready.

We also have not finished Driver C. I believe we left off at C12 if you'd rather pick up from there.

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

I was going through # C12 that was sent yesterday, I see that the error message, and Processing Status are being populated correctly, but, the HB message in error is not as per the SPEXS Specification.

Do you want to try the CSOR and come back and fix #C12 later ? Please let me know.

Hi Asma,

I believe the Driver C CSOR problems from yesterday are resolved. I have deleted the pointer and am ready to issue the UD again for test C11. Let me know when you are ready.

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

Gary,

The D31 conviction on the H3 message indicates that the Jurisdiction Code Convicting is "AI", the H3 message that was sent as part of the CSOR was sent with Jurisdiction Code Convicting as "P2" for D31 conviction.

Can you please look.

Thanks,

Gary,

I was going through # C12 that was sent yesterday, I see that the error message, and Processing Status are being populated correctly, but, the HB message in error is not as per the SPEXS Specification.

Do you want to try the CSOR and come back and fix #C12 later ? Please let me know.

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

Gary,

I still see that the Jurisdiction Code Conviction on the H3 message for ACD Code D31 is 'AI'.

During the CSOR, the D31 Conviction on H3 message was sent with Jurisdiction Code Conviction as 'P2'.

H3 sent during CSOR :

DCICHI	CITATION CDL HOLDER INDICATOR	1	1
DCIDCI	CITATION DATE	1	20150909
DCVCOM	CONVICTION COMMERCIAL VEH IND	1	1
DCVCRT	CONVICTION COURT TYPE	1	CIR

DCVCOR	CONVICTION JURISDICTION OFFENSE	1	D31
DCVCCA	CONVICTION OFFENSE ACD CODE	1	D31
DCVJUR	JURISDICTION CODE - CONVICTING	1	P2

H3 sent after CSOR from AI:

DCIDCI	CITATION DATE	1	20150909
DCVCOM	CONVICTION COMMERCIAL VEH IND	1	1
DCVCRT	CONVICTION COURT TYPE	1	CIR
DCVDCV	CONVICTION DATE	1	20151111

Do you want to try the CSOR and come back and fix #C12 later ? Please let me know.

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks

Gary

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks Asma

Siri, we left off at D2 and can continue when you're ready.

We also have not finished Driver C. I believe we left off at C12 if you'd rather pick up from there.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks
Gary

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks

Dear Fraud Exemplar Contacts~

You are receiving this email because your jurisdiction designated you as the Contact for Training Exemplars. If you are no longer the person of contact, please notify me immediately.

AAMVA knows how important it is for each jurisdiction to have sample documents to use with their training programs and has been working with the federal agencies to obtain sample documents suitable for training. I am happy to announce the United States Department of State /Bureau of Consular Affairs/Office of Fraud Preventions has provided AAMVA with **US Permanent Resident (LPR) and US Employment Authorization (EAD) cards**. We can provide two of each document per jurisdiction.

We also have a few extra **"Service Passports"** available if your jurisdiction is interested in obtaining them, please indicate it on the contact sheet.

Due to security reasons, we must request that each jurisdiction identify a primary and secondary contact in their jurisdiction to monitor and track the exemplars in order for us to disseminate these materials. By filling out and faxing in the form below, the individuals identified are accepting responsibility for the exemplars the jurisdictions receive. If they are stolen or misplaced they will need to notify AAMVA immediately.

If your jurisdiction is interested in obtaining training samples, please fill out the attached form and email it back to me.

Your assistance is appreciated. If you have any questions or concerns, please feel free to contact me at 703.908.5767 or dhanchulak@aamva.org

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

Gary,

The D31 conviction on the H3 message indicates that the Jurisdiction Code Convicting is "AI" , the H3 message that was sent as part of the CSOR was sent with Jurisdiction Code Convicting as "P2" for D31 conviction.

Can you please look.

Thanks,

Gary,

I was going through # C12 that was sent yesterday, I see that the error message, and Processing Status are being populated correctly, but, the HB message in error is not as per the SPEXS Specification.

Do you want to try the CSOR and come back and fix #C12 later ? Please let me know.

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Gary,

C15 looks good.

The only test case pending from Driver C is # C12 (AI returns the SB/HB message with error as 'CONFIRMATION OF NEW SOR, BUT DHR NOT READY') .

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

Gary,

I still see that the Jurisdiction Code Conviction on the H3 message for ACD Code D31 is 'AI'.

During the CSOR, the D31 Conviction on H3 message was sent with Jurisdiction Code Conviction as 'P2'.

H3 sent during CSOR :

DCICHI	CITATION CDL HOLDER INDICATOR	1	1
DCIDCI	CITATION DATE	1	20150909
DCVCOM	CONVICTION COMMERCIAL VEH IND	1	1
DCVCRT	CONVICTION COURT TYPE	1	CIR

DCVCOR	CONVICTION JURISDICTION OFFENSE	1	D31
DCVCCA	CONVICTION OFFENSE ACD CODE	1	D31
DCVJUR	JURISDICTION CODE - CONVICTING	1	P2

H3 sent after CSOR from AI:

DCIDCI	CITATION DATE	1	20150909
DCVCOM	CONVICTION COMMERCIAL VEH IND	1	1
DCVCRT	CONVICTION COURT TYPE	1	CIR
DCVDCV	CONVICTION DATE	1	20151111

Do you want to try the CSOR and come back and fix #C12 later ? Please let me know.

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Thanks Asma

Siri, we left off at D2 and can continue when you're ready.

We also have not finished Driver C. I believe we left off at C12 if you'd rather pick up from there.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

Gary,

I still see that the Jurisdiction Code Conviction on the H3 message for ACD Code D31 is 'AI'.

During the CSOR, the D31 Conviction on H3 message was sent with Jurisdiction Code Conviction as 'P2'.

H3 sent during CSOR :

 Gary,

I was going through # C12 that was sent yesterday, I see that the error message, and Processing Status are being populated correctly, but, the HB message in error is not as per the SPEXS Specification.

Do you want to try the CSOR and come back and fix #C12 later ? Please let me know.

Hi Asma,

I believe the Driver C CSOR problems from yesterday are resolved. I have deleted the pointer and am ready to issue the UD again for test C11. Let me know when you are ready.

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Gary,

The D31 conviction on the H3 message indicates that the Jurisdiction Code Convicting is "AI", the H3 message that was sent as part of the CSOR was sent with Jurisdiction Code Convicting as "P2" for D31 conviction.

Can you please look.

Thanks,

 Gary,

I was going through # C12 that was sent yesterday, I see that the error message, and Processing Status are being populated correctly, but, the HB message in error is not as per the SPEXS Specification.

Do you want to try the CSOR and come back and fix #C12 later ? Please let me know.

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

That's correct Gary.

Please delete the Driver, I will add it back and you can then send # C10 (no H* message will be sent)

Once, CSOR is in progress, I will send # C12.

Thanks,
Asma

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Gary,

C15 looks good.

The only test case pending from Driver C is # C12 (AI returns the SB/HB message with error as 'CONFIRMATION OF NEW SOR, BUT DHR NOT READY') .

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

Gary,

I still see that the Jurisdiction Code Conviction on the H3 message for ACD Code D31 is 'AI'.

During the CSOR, the D31 Conviction on H3 message was sent with Jurisdiction Code Conviction as 'P2'.

H3 sent during CSOR :

DCICHI	CITATION CDL HOLDER INDICATOR	1	1
DCIDCI	CITATION DATE	1	20150909
DCVCOM	CONVICTION COMMERCIAL VEH IND	1	1
DCVCRT	CONVICTION COURT TYPE	1	CIR

H3 sent after CSOR from AI:

DCIDCI	CITATION DATE	1	20150909
DCVCOM	CONVICTION COMMERCIAL VEH IND	1	1
DCVCRT	CONVICTION COURT TYPE	1	CIR
DCVDCV	CONVICTION DATE	1	20151111

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Good Morning Gary,

I think since the issue is fixed, we can complete Driver C and then move on to Driver D. I sent C12 and it looked good, please go ahead with completing the CSOR by sending the CC message for C11.

Thank you,
Siri.

Siri, we left off at D2 and can continue when you're ready.

We also have not finished Driver C. I believe we left off at C12 if you'd rather pick up from there.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks

That's correct Gary.

Please delete the Driver, I will add it back and you can then send # C10 (no H* message will be sent)

Once, CSOR is in progress, I will send # C12.

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

Gary,

I was going through # C12 that was sent yesterday, I see that the error message, and Processing Status are being populated correctly, but, the HB message in error is not as per the SPEXS Specification.

Do you want to try the CSOR and come back and fix #C12 later ? Please let me know.

For HB Message with error, please refer:

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Please delete the Driver, I will add it back and you can then send # C10 (no H* message will be sent)

Once, CSOR is in progress, I will send # C12.

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

Gary,

I still see that the Jurisdiction Code Conviction on the H3 message for ACD Code D31 is 'AI'.

During the CSOR, the D31 Conviction on H3 message was sent with Jurisdiction Code Conviction as 'P2'.

H3 sent during CSOR :

DCICHI	CITATION CDL HOLDER INDICATOR	1	1
DCIDCI	CITATION DATE	1	20150909
DCVCOM	CONVICTION COMMERCIAL VEH IND	1	1
DCVCRT	CONVICTION COURT TYPE	1	CIR

DCVCOR	CONVICTION JURISDICTION OFFENSE	1	D31
DCVCCA	CONVICTION OFFENSE ACD CODE	1	D31
DCVJUR	JURISDICTION CODE - CONVICTING	1	P2

H3 sent after CSOR from AI:

DCIDCI	CITATION DATE	1	20150909
DCVCOM	CONVICTION COMMERCIAL VEH IND	1	1
DCVCRT	CONVICTION COURT TYPE	1	CIR
DCVDCV	CONVICTION DATE	1	20151111

The D31 conviction on the H3 message indicates that the Jurisdiction Code Convicting is "AI", the H3 message that was sent as part of the CSOR was sent with Jurisdiction Code Convicting as "P2" for D31 conviction.

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

That's correct Gary.

Please delete the Driver, I will add it back and you can then send # C10 (no H* message will be sent)

Once, CSOR is in progress, I will send # C12.

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again

- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

The only test case pending from Driver C is # C12 (AI returns the SB/HB message with error as 'CONFIRMATION OF NEW SOR, BUT DHR NOT READY') .

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

Gary,

I still see that the Jurisdiction Code Conviction on the H3 message for ACD Code D31 is 'A1'.

During the CSOR, the D31 Conviction on H3 message was sent with Jurisdiction Code Conviction as 'P2'.

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

Ok, earlier I noticed that on the H* messages, there was an extra 'P3' and corrected that but now the license number is good and not sure why you are receiving the error, let me look. I think you would receive the P3 license number on the H*. Could you please take a look as well?

Thank you

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

Gary,

The D31 conviction on the H3 message indicates that the Jurisdiction Code Convicting is "AI", the H3 message that was sent as part of the CSOR was sent with Jurisdiction Code Convicting as "P2" for D31 conviction.

Can you please look.

Thanks,

Gary,

I was going through # C12 that was sent yesterday, I see that the error message, and Processing Status are being populated correctly, but, the HB message in error is not as per the SPEXS Specification.

Do you want to try the CSOR and come back and fix #C12 later ? Please let me know.

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

That's correct Gary.

Please delete the Driver, I will add it back and you can then send # C10 (no H* message will be sent)

Once, CSOR is in progress, I will send # C12.

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

C15 looks good.

The only test case pending from Driver C is # C12 (AI returns the SB/HB message with error as 'CONFIRMATION OF NEW
SOR, BUT DHR NOT READY') .

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

Gary,

I still see that the Jurisdiction Code Conviction on the H3 message for ACD Code D31 is 'AI'.

During the CSOR, the D31 Conviction on H3 message was sent with Jurisdiction Code Conviction as 'P2'.

H3 sent during CSOR :

H3 sent after CSOR from AI:

DCIDCI	CITATION DATE	1	20150909
DCVCOM	CONVICTION COMMERCIAL VEH IND	1	1
DCVCRT	CONVICTION COURT TYPE	1	CIR
DCVDCV	CONVICTION DATE	1	20151111

Ok, since the CSOR is complete, can you please delete the AI pointer, so that I can re-add driver C and we can try the UD again?

Thank you

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Good Morning Gary,

I think since the issue is fixed, we can complete Driver C and then move on to Driver D. I sent C12 and it looked good, please go ahead with completing the CSOR by sending the CC message for C11.

Thank you,

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

Gary,

Sent # C13. I was expecting a valid response (since the CSOR is completed)

HC is with error "CONFIRMATION OF NEW SOR, BUT DHR NOT READY"

Can you please look.

Thanks,
Asma

I would like to run the CSOR first to be sure it doesn't have further problems. And then if possible, I'd like to go back to Driver D since those tests also deal with error processing. I could then address all of the issues at once.

Gary,

I was going through # C12 that was sent yesterday, I see that the error message, and Processing Status are being populated correctly, but, the HB message in error is not as per the SPEXS Specification.

Do you want to try the CSOR and come back and fix #C12 later ? Please let me know.

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Gary,

C12 looks good.

This completes Driver C.

Shall we continue with Driver D after our status meeting ?

Thanks,
Asma

That's correct Gary.

Please delete the Driver, I will add it back and you can then send # C10 (no H* message will be sent)

Once, CSOR is in progress, I will send # C12.

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

C15 looks good.

The only test case pending from Driver C is # C12 (AI returns the SB/HB message with error as 'CONFIRMATION OF NEW SOR, BUT DHR NOT READY') .

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

Gary,

I still see that the Jurisdiction Code Conviction on the H3 message for ACD Code D31 is 'AI'.

During the CSOR, the D31 Conviction on H3 message was sent with Jurisdiction Code Conviction as 'P2'.

H3 sent during CSOR :

DCICHI	CITATION CDL HOLDER INDICATOR	1	1
DCIDCI	CITATION DATE	1	20150909
DCVCOM	CONVICTION COMMERCIAL VEH IND	1	1
DCVCRT	CONVICTION COURT TYPE	1	CIR

H3 sent after CSOR from AI:

DCIDCI	CITATION DATE	1	20150909
DCVCOM	CONVICTION COMMERCIAL VEH IND	1	1
DCVCRT	CONVICTION COURT TYPE	1	CIR
DCVDCV	CONVICTION DATE	1	20151111

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Good Morning Gary,

I think since the issue is fixed, we can complete Driver C and then move on to Driver D. I sent C12 and it looked good, please go ahead with completing the CSOR by sending the CC message for C11.

Thank you,
Siri.

Siri, we left off at D2 and can continue when you're ready.

We also have not finished Driver C. I believe we left off at C12 if you'd rather pick up from there.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed

- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

This time it appears the CSOR succeeded. I see the convictions, withdrawals and accident have been saved. CC has been sent and CE received.

I would like to run the CSOR first to be sure it doesn't have further problems. And then if possible, I'd like to go back to Driver D since those tests also deal with error processing. I could then address all of the issues at once.

Gary,

I was going through # C12 that was sent yesterday, I see that the error message, and Processing Status are being populated correctly, but, the HB message in error is not as per the SPEXS Specification.

Do you want to try the CSOR and come back and fix #C12 later ? Please let me know.

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

That's correct Gary.

Please delete the Driver, I will add it back and you can then send # C10 (no H* message will be sent)

Once, CSOR is in progress, I will send # C12.

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed

- Then run C12.

Does that sound correct?

C15 looks good.

The only test case pending from Driver C is # C12 (AI returns the SB/HB message with error as 'CONFIRMATION OF NEW

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

Gary,

I still see that the Jurisdiction Code Conviction on the H3 message for ACD Code D31 is 'AI'.

During the CSOR, the D31 Conviction on H3 message was sent with Jurisdiction Code Conviction as 'P2'.

H3 sent during CSOR :

DCICHI	CITATION CDL HOLDER INDICATOR	1	1
DCIDCI	CITATION DATE	1	20150909
DCVCOM	CONVICTION COMMERCIAL VEH IND	1	1
DCVCRT	CONVICTION COURT TYPE	1	CIR

Siri, we left off at D2 and can continue when you're ready.

We also have not finished Driver C. I believe we left off at C12 if you'd rather pick up from there.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

This time it appears the CSOR succeeded. I see the convictions, withdrawals and accident have been saved. CC has been sent and CE received.

I would like to run the CSOR first to be sure it doesn't have further problems. And then if possible, I'd like to go back to Driver D since those tests also deal with error processing. I could then address all of the issues at once.

Gary,

I was going through # C12 that was sent yesterday, I see that the error message, and Processing Status are being populated correctly, but, the HB message in error is not as per the SPEXS Specification.

Do you want to try the CSOR and come back and fix #C12 later ? Please let me know.

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

That's correct Gary.

Please delete the Driver, I will add it back and you can then send # C10 (no H* message will be sent)

Once, CSOR is in progress, I will send # C12.

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

C15 looks good.

The only test case pending from Driver C is # C12 (AI returns the SB/HB message with error as 'CONFIRMATION OF NEW

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

Gary,

I still see that the Jurisdiction Code Conviction on the H3 message for ACD Code D31 is 'AI'.

During the CSOR, the D31 Conviction on H3 message was sent with Jurisdiction Code Conviction as 'P2'.

H3 sent during CSOR :

DCICHI	CITATION CDL HOLDER INDICATOR	1	1
DCIDCI	CITATION DATE	1	20150909
DCVCOM	CONVICTION COMMERCIAL VEH IND	1	1
DCVCRT	CONVICTION COURT TYPE	1	CIR

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Siri, we left off at D2 and can continue when you're ready.

We also have not finished Driver C. I believe we left off at C12 if you'd rather pick up from there.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks
Gary

Gary,

D4 sent, error received.

But GPROST was sent as '02', I was expecting '01':

Value	Meaning/Description
*** ALL APPLICATIONS ***	
'00'	Processing successful
*** MOST APPLICATIONS ***	
* (all applications except 02, 05 & 12) *	
'01'	Processing unsuccessful
*** CDLIS (02) and SPEXS (37) ***	
'01'	Logic error (i.e. record not found or data look up error)
'02'	System error (i.e. file off-line)
'03'	Syntax error (i.e. element required, content or cross check)
'04'	Security Exception (i.e. authentication or authorization error)
'05'	Confirmation of new SOR, but DHR not ready
'06'	Message sent outside of CDLIS processing window
'07'	Successful transmission to Web Services Gateway

Can you please look.

Thanks,
Asma

Siri, we left off at D2 and can continue when you're ready.

We also have not finished Driver C. I believe we left off at C12 if you'd rather pick up from there.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks

This is another fix. The problems with error responses may be a little more involved than the CSOR problem. I will see if I can resolve it first so hopefully we can wrap up Driver C today. I'll let you know hopefully within the hour.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Gary,

C15 looks good.

The only test case pending from Driver C is # C12 (AI returns the SB/HB message with error as 'CONFIRMATION OF NEW SOR, BUT DHR NOT READY') .

Thanks,

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

Gary,

I still see that the Jurisdiction Code Conviction on the H3 message for ACD Code D31 is 'AI'.

During the CSOR, the D31 Conviction on H3 message was sent with Jurisdiction Code Conviction as 'P2'.

H3 sent during CSOR :

DCICHI	CITATION CDL HOLDER INDICATOR	1	1
DCIDCI	CITATION DATE	1	20150909
DCVCOM	CONVICTION COMMERCIAL VEH IND	1	1
DCVCRT	CONVICTION COURT TYPE	1	CIR

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

I would like to run the CSOR first to be sure it doesn't have further problems. And then if possible, I'd like to go back to Driver D since those tests also deal with error processing. I could then address all of the issues at once.

Gary,

I was going through # C12 that was sent yesterday, I see that the error message, and Processing Status are being populated correctly, but, the HB message in error is not as per the SPEXS Specification.

Do you want to try the CSOR and come back and fix #C12 later ? Please let me know.

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

I will need to skip the Driver D tests that include name error responses, but yes we can continue with other steps.

Gary,

C12 looks good.

This completes Driver C.

Shall we continue with Driver D after our status meeting ?

That's correct Gary.

Please delete the Driver, I will add it back and you can then send # C10 (no H* message will be sent)

Once, CSOR is in progress, I will send # C12.

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Good Morning Gary,

I think since the issue is fixed, we can complete Driver C and then move on to Driver D. I sent C12 and it looked good, please go ahead with completing the CSOR by sending the CC message for C11.

Thank you,
Siri.

Siri, we left off at D2 and can continue when you're ready.

We also have not finished Driver C. I believe we left off at C12 if you'd rather pick up from there.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks

Gary,

Since the pointer is a CDL holder, you are required to provide a Med Self Certification Code:

ID	Clear Name and Identifier	Implementation Name	Validation		4.1	5.1	5.3	6.0
MED. XCHK. 200	Jurisdiction Code - Licensing (DDLJUR)	CLMF-DRIVER-LICENSE-JURIS Format=Alpha-numeric Size=2	If Jurisdiction Code - Licensing (DDLJUR) is in the "United States" list under Jurisdiction Code (BJUCDE) in Appendix D: Data Dictionary (on page 1871), and Driver License Commercial Status (DDLCTS) is 'LIC', Medical Self Certification Code (DDLSTC) is required.	HC			x	x
				HD			x	x
				HG			x	x
	Driver License Commercial Status (DDLCTS)	CLMF-DESC-CDL-STATUS Format=Alpha-numeric Size=3						
	Medical Self Certification Code (DDLSTC)	CLMF-MED-SELF-CERTIFICATION Format=Alpha-numeric Size=2

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Gary,

The D31 conviction on the H3 message indicates that the Jurisdiction Code Convicting is "AI", the H3 message that was sent as part of the CSOR was sent with Jurisdiction Code Convicting as "P2" for D31 conviction.

Can you please look.

Thanks,

Gary,

I was going through # C12 that was sent yesterday, I see that the error message, and Processing Status are being populated correctly, but, the HB message in error is not as per the SPEXS Specification.

Do you want to try the CSOR and come back and fix #C12 later ? Please let me know.

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Asma, I've added the medical cert but see there is a bug with assigning the license class. The specified doc type = 9 exposed a problem with the class ranking logic.

I will see if I can get a fix out within the hour but realize it is getting close to the end of your day.

Since the pointer is a CDL holder, you are required to provide a Med Self Certification Code:

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

I would like to run the CSOR first to be sure it doesn't have further problems. And then if possible, I'd like to go back to Driver D since those tests also deal with error processing. I could then address all of the issues at once.

Gary,

I was going through # C12 that was sent yesterday, I see that the error message, and Processing Status are being populated correctly, but, the HB message in error is not as per the SPEXS Specification.

Do you want to try the CSOR and come back and fix #C12 later ? Please let me know.

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Asma, I've added the medical cert but see there is a bug with assigning the license class. The specified doc type = 9 exposed a problem with the class ranking logic.

I will see if I can get a fix out within the hour but realize it is getting close to the end of your day.

 Gary,

Since the pointer is a CDL holder, you are required to provide a Med Self Certification Code:

ID	Clear Name and Identifier	Implementation Name	Validation		4.1	5.1	5.3	6.0
MED. XCHK. 200	Jurisdiction Code - Licensing (DDLJUR)	CLMF-DRIVER-LICENSE-JURIS Format=Alpha-numeric Size=2	If Jurisdiction Code - Licensing (DDLJUR) is in the "United States" list under Jurisdiction Code (BJUCDE) in Appendix D: Data Dictionary (on page 1871), and Driver License Commercial Status (DDLCTS) is 'LIC', Medical Self Certification Code (DDLST) is required.	HC			x	x
				HD			x	x
				HG			x	x
	Driver License Commercial Status (DDLCTS)	CLMF-DESC-CDL-STATUS Format=Alpha-numeric Size=3						
	Medical Self Certification Code (DDLST)	CLMF-MED-SELF-CERTIFICATION Format=Alpha-numeric Size=2

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

Ok, earlier I noticed that on the H* messages, there was an extra 'P3' and corrected that but now the license number is good and not sure why you are receiving the error, let me look. I think you would receive the P3 license number on the H*. Could you please take a look as well?

Thank you

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Good Morning Gary,

I think since the issue is fixed, we can complete Driver C and then move on to Driver D. I sent C12 and it looked good, please go ahead with completing the CSOR by sending the CC message for C11.

Thank you,

Asma, I've added the medical cert but see there is a bug with assigning the license class. The specified doc type = 9 exposed a problem with the class ranking logic.

I will see if I can get a fix out within the hour but realize it is getting close to the end of your day.

That's correct Gary.

Please delete the Driver, I will add it back and you can then send # C10 (no H* message will be sent)

Once, CSOR is in progress, I will send # C12.

Thanks,
Asma

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Gary,

C15 looks good.

The only test case pending from Driver C is # C12 (AI returns the SB/HB message with error as 'CONFIRMATION OF NEW SOR, BUT DHR NOT READY') .

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

Gary,

I still see that the Jurisdiction Code Conviction on the H3 message for ACD Code D31 is 'AI'.

During the CSOR, the D31 Conviction on H3 message was sent with Jurisdiction Code Conviction as 'P2'.

H3 sent during CSOR :

DCICHI	CITATION CDL HOLDER INDICATOR	1	1
DCIDCI	CITATION DATE	1	20150909
DCVCOM	CONVICTION COMMERCIAL VEH IND	1	1
DCVCRT	CONVICTION COURT TYPE	1	CIR

H3 sent after CSOR from AI:

DCIDCI	CITATION DATE	1	20150909
DCVCOM	CONVICTION COMMERCIAL VEH IND	1	1
DCVCRT	CONVICTION COURT TYPE	1	CIR
DCVDCV	CONVICTION DATE	1	20151111

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Gary,

I was expecting # D2 in error "DUPLICATE CONVICTION", but received '9999 99TE CONVICTION'.

Can you please look.

Thanks,
Asma

Asma, I've added the medical cert but see there is a bug with assigning the license class. The specified doc type = 9 exposed a problem with the class ranking logic.

I will see if I can get a fix out within the hour but realize it is getting close to the end of your day.

Apparently the CDL was expired, which I am resolving. Regarding the medical self cert code, are you expecting the driver to have a medical certificate or just that this parameter is required?

Please delete the Driver, I will add it back and you can then send # C10 (no H* message will be sent)

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Good Morning Gary,

I think since the issue is fixed, we can complete Driver C and then move on to Driver D. I sent C12 and it looked good, please go ahead with completing the CSOR by sending the CC message for C11.

Thank you,
Siri.

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Asma, I've added the medical cert but see there is a bug with assigning the license class. The specified doc type = 9 exposed a problem with the class ranking logic.

I will see if I can get a fix out within the hour but realize it is getting close to the end of your day.

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Sure Gary,

We can continue with Driver D.

For the question you have, I will check internally and will let you know.

Replying on Driver D email chain.

Thanks,
Asma

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

Gary,

I still see that the Jurisdiction Code Conviction on the H3 message for ACD Code D31 is 'AI'.

During the CSOR, the D31 Conviction on H3 message was sent with Jurisdiction Code Conviction as 'P2'.

H3 sent during CSOR :

DCICHI	CITATION CDL HOLDER INDICATOR	1	1
DCIDCI	CITATION DATE	1	20150909
DCVCOM	CONVICTION COMMERCIAL VEH IND	1	1
DCVCRT	CONVICTION COURT TYPE	1	CIR

DCVCOR	CONVICTION JURISDICTION OFFENS	1	D31
DCVCCA	CONVICTION OFFENSE ACD CODE	1	D31
DCVJUR	JURISDICTION CODE - CONVICTING	1	P2

H3 sent after CSOR from AI:

DCIDCI	CITATION DATE	1	20150909
DCVCOM	CONVICTION COMMERCIAL VEH IND	1	1
DCVCRT	CONVICTION COURT TYPE	1	CIR
DCVDCV	CONVICTION DATE	1	20151111

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Asma, I've added the medical cert but see there is a bug with assigning the license class. The specified doc type = 9 exposed a problem with the class ranking logic.

I will see if I can get a fix out within the hour but realize it is getting close to the end of your day.

 Gary,

Since the pointer is a CDL holder, you are required to provide a Med Self Certification Code:

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

The CE failed to update the pointer status. This is another bug that will need to be addressed, so we'll need to come back to C11.

Is it ok to jump back to D2?

Gary,

Sent # C13. I was expecting a valid response (since the CSOR is completed)

HC is with error "CONFIRMATION OF NEW SOR, BUT DHR NOT READY"

Can you please look.

I would like to run the CSOR first to be sure it doesn't have further problems. And then if possible, I'd like to go back to Driver D since those tests also deal with error processing. I could then address all of the issues at once.

Gary,

I was going through # C12 that was sent yesterday, I see that the error message, and Processing Status are being populated correctly, but, the HB message in error is not as per the SPEXS Specification.

Do you want to try the CSOR and come back and fix #C12 later ? Please let me know.

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Asma, I've added the medical cert but see there is a bug with assigning the license class. The specified doc type = 9 exposed a problem with the class ranking logic.

I will see if I can get a fix out within the hour but realize it is getting close to the end of your day.

 Gary,

Since the pointer is a CDL holder, you are required to provide a Med Self Certification Code:

ID	Clear Name and Identifier	Implementation Name	Validation		4.1	5.1	5.3	6.0
MED. XCHK. 200	Jurisdiction Code - Licensing (DDLJUR)	CLMF-DRIVER-LICENSE- JURIS Format=Alpha- numeric Size=2	If Jurisdiction Code - Licensing (DDLJUR) is in the "United States" list under Jurisdiction Code (BJUCDE) in Appendix D: Data Dictionary (on page 1871), and Driver License Commercial Status (DDLCTS) is 'LIC', Medical Self Certification Code (DDLST) is required.	HC			x	x
				HD			x	x
				HG			x	x
	Driver License Commercial Status (DDLCTS)	CLMF-DESC-CDL-STATUS Format=Alpha- numeric Size=3

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

Hi Asma,

I believe the Driver C CSOR problems from yesterday are resolved. I have deleted the pointer and am ready to issue the UD again for test C11. Let me know when you are ready.

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

That's correct Gary.

Please delete the Driver, I will add it back and you can then send # C10 (no H* message will be sent)

Once, CSOR is in progress, I will send # C12.

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Good Morning Gary,

I think since the issue is fixed, we can complete Driver C and then move on to Driver D. I sent C12 and it looked good, please go ahead with completing the CSOR by sending the CC message for C11.

Thank you,
Siri.

Siri, we left off at D2 and can continue when you're ready.

We also have not finished Driver C. I believe we left off at C12 if you'd rather pick up from there.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Sure Gary,

We can continue with Driver D.

For the question you have, I will check internally and will let you know.

Replying on Driver D email chain.

Thanks,
Asma

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

Gary,

I still see that the Jurisdiction Code Conviction on the H3 message for ACD Code D31 is 'AI'.

During the CSOR, the D31 Conviction on H3 message was sent with Jurisdiction Code Conviction as 'P2'.

H3 sent during CSOR :

DCICHI	CITATION CDL HOLDER INDICATOR	1	1
DCIDCI	CITATION DATE	1	20150909
DCVCOM	CONVICTION COMMERCIAL VEH IND	1	1
DCVCRT	CONVICTION COURT TYPE	1	CIR

DCVCOR	CONVICTION JURISDICTION OFFENS	1	D31
DCVCCA	CONVICTION OFFENSE ACD CODE	1	D31
DCVJUR	JURISDICTION CODE - CONVICTING	1	P2

H3 sent after CSOR from AI:

DCIDCI	CITATION DATE	1	20150909
DCVCOM	CONVICTION COMMERCIAL VEH IND	1	1
DCVCRT	CONVICTION COURT TYPE	1	CIR
DCVDCV	CONVICTION DATE	1	20151111

The D31 conviction on the H3 message indicates that the Jurisdiction Code Convicting is "AI", the H3 message that was sent as part of the CSOR was sent with Jurisdiction Code Convicting as "P2" for D31 conviction.

Gary,

I was going through # C12 that was sent yesterday, I see that the error message, and Processing Status are being populated correctly, but, the HB message in error is not as per the SPEXS Specification.

Do you want to try the CSOR and come back and fix #C12 later ? Please let me know.

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Asma, I've added the medical cert but see there is a bug with assigning the license class. The specified doc type = 9 exposed a problem with the class ranking logic.

I will see if I can get a fix out within the hour but realize it is getting close to the end of your day.

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

Gary,

The D31 conviction on the H3 message indicates that the Jurisdiction Code Convicting is "AI", the H3 message that was sent as part of the CSOR was sent with Jurisdiction Code Convicting as "P2" for D31 conviction.

Can you please look.

Thanks,
Asma

Gary,

I was going through # C12 that was sent yesterday, I see that the error message, and Processing Status are being populated correctly, but, the HB message in error is not as per the SPEXS Specification.

Do you want to try the CSOR and come back and fix #C12 later ? Please let me know.

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

The B56 conviction was loaded via ROOSC, so there is no linked withdrawal. The H7 reflects the single linkage of the U10 withdrawal and conviction that was loaded via the ROOSW.

So even though there is no linkage to the B56 conviction, do you still expect the CONVICTION ID CODE in the H3 to be populated?

There are no errors on the HD message this time.

On the H3 message, for the B26 ACD conviction, CONVICTION ID CODE is blank.

Can you please look.

Asma, I've added the medical cert but see there is a bug with assigning the license class. The specified doc type = 9 exposed a problem with the class ranking logic.

I will see if I can get a fix out within the hour but realize it is getting close to the end of your day.

Gary,

Since the pointer is a CDL holder, you are required to provide a Med Self Certification Code:

ID	Clear Name and Identifier	Implementation Name	Validation		4.1	5.1	5.3	6.0
MED. XCHK. 200	Jurisdiction Code - Licensing (DDLJUR)	CLMF-DRIVER-LICENSE-JURIS Format=Alpha-numeric Size=2	If Jurisdiction Code - Licensing (DDLJUR) is in the "United States" list under Jurisdiction Code (BJUCDE) in Appendix D: Data Dictionary (on page 1871), and Driver License Commercial Status (DDLCTS) is 'LIC', Medical Self Certification Code (DDLST) is required.	HC			x	x
				HD			x	x
				HG			x	x
	Driver License Commercial Status (DDLCTS)	CLMF-DESC-CDL-STATUS Format=Alpha-numeric Size=3

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

I would like to run the CSOR first to be sure it doesn't have further problems. And then if possible, I'd like to go back to Driver D since those tests also deal with error processing. I could then address all of the issues at once.

Gary,

I was going through # C12 that was sent yesterday, I see that the error message, and Processing Status are being populated correctly, but, the HB message in error is not as per the SPEXS Specification.

Do you want to try the CSOR and come back and fix #C12 later ? Please let me know.

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

The B56 conviction was loaded via ROOSC, so there is no linked withdrawal. The H7 reflects the single linkage of the U10 withdrawal and conviction that was loaded via the ROOSW.

So even though there is no linkage to the B56 conviction, do you still expect the CONVICTION ID CODE in the H3 to be populated?

Asma, I've added the medical cert but see there is a bug with assigning the license class. The specified doc type = 9 exposed a problem with the class ranking logic.

I will see if I can get a fix out within the hour but realize it is getting close to the end of your day.

 Gary,

Since the pointer is a CDL holder, you are required to provide a Med Self Certification Code:

ID	Clear Name and Identifier	Implementation Name	Validation		4.1	5.1	5.3	6.0
MED. XCHK. 200	Jurisdiction Code - Licensing (DDLJUR)	CLMF-DRIVER-LICENSE-JURIS Format=Alpha-numeric Size=2	If Jurisdiction Code - Licensing (DDLJUR) is in the "United States" list under Jurisdiction Code (BJUCDE) in Appendix D: Data Dictionary (on page 1871), and Driver License Commercial Status (DDLCTS) is 'LIC', Medical Self Certification Code (DDLST) is required.	HC			x	x
				HD			x	x
	Driver License Commercial Status (DDLCTS)	CLMF-DESC-CDL-STATUS Format=Alpha-numeric Size=3		HG			x	x
	Medical Self Certification Code (DDLST)	CLMF-MED-SELF-CERTIFICATION Format=Alpha-numeric Size=2

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

Ok, earlier I noticed that on the H* messages, there was an extra 'P3' and corrected that but now the license number is good and not sure why you are receiving the error, let me look. I think you would receive the P3 license number on the H*. Could you please take a look as well?

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

I think since the issue is fixed, we can complete Driver C and then move on to Driver D. I sent C12 and it looked good, please go ahead with completing the CSOR by sending the CC message for C11.

CDL Examiner Update Class

AAMVA will be conducting two Commercial Driver License (CDL) Examiner Update Classes the week of September 11th at Pinellas Technical College (PTC) in St. Petersburg, Florida. The class size is limited to 12 persons; and will be held as follows:

Class 1: Monday, September 11th thru Wednesday, September 13th

Class 2: Thursday, September 14th thru Saturday, September 16th

The class is designed to be a hands-on training class for experienced CDL Examiners or trainers. The class will focus on recent guidance provided by FMCSA related to CDL Classification/Endorsements & Restrictions, CDL Skills Test administration and scoring; and revisions to the CDL Test System. There is no tuition or registration fee for this training. All travel, room and board expenses will be paid by AAMVA. Nominees must have a thorough knowledge of the CDL program and current experience conducting CDL Skill Tests. Please submit completed [Nomination Forms](#) to Karen Morton via email at kmorton@aamva.org no later than **Friday, July 21, 2017**, as class sizes are limited. After the nominations are reviewed, detailed class and travel information will be sent to those persons selected to attend. If you have questions or need additional information, please contact Karen Morton at kmorton@aamva.org.

Nevada DMV Investigators Catch Federal Fugitive on the Run for 25 Years

A career criminal who turned violent after escaping federal custody and fleeing to Nevada has been brought back to justice. Robert Frederick Nelson, 64, of North Las Vegas, committed a string of violent felonies in Nevada after he escaped from a Minnesota federal prison in 1992. He is now back in federal custody following his arrest by investigators from the Nevada Department of Motor Vehicles' Compliance Enforcement Division. Nelson applied for a renewal of his Nevada identification card on June 5, 2017. Investigators withheld the card after the DMV's facial recognition system showed the same person had previously held a Nevada driver's license in the name of Craig James Pautler. Investigators found Nelson had a string of felony convictions under both names. He was arrested June 20 at the Decatur DMV office in Las Vegas on charges of failing to register as a felon and an outstanding traffic warrant. Fraud charges relating to the false identity of Craig Pautler were added later. [Read more here.](#)

Northeast States Receive Top Honors in National Competition

NHTSA Requests Comment On Crash Risk Associated With Drug And Alcohol Use By Drivers In Injury Crashes ICR

The National Highway Traffic Safety Administration (NHTSA) [requests public comment](#) on a proposed collection of information (ICR) on "Crash Risk Associated With Drug And Alcohol Use By Drivers In Fatal And Serious Injury Crashes." NHTSA seeks to examine the risk of being severely injured in a motor vehicle crash when drivers use licit and illicit drugs. This effort will involve studying seriously or fatally injured drivers in crashes and matched non-crash-involved drivers. Participants will include seriously injured drivers who are transported to a trauma center by emergency medical services and fatally injured drivers transported directly to the medical examiner's office. Comments must be received on or before September 15, 2017.

NHTSA Requests Comment On Visual Scanning Training for Older Drivers ICR

The National Highway Traffic Safety Administration (NHTSA) [requests public comment](#) on a proposed collection of information (ICR) on "Visual Scanning Training for Older Drivers." The National Highway Traffic Safety Administration (NHTSA) proposes to collect information from licensed older drivers to determine (1) their eligibility to participate in a study of the effectiveness of a visual scanning training protocol to improve driving safety, (2) their attitudes about the training procedures and their perceptions of its benefits, and (3) the driving performance during on-road evaluations to measure training effectiveness. Comments must be received on or before September 15, 2017.

GAO Issues Report On FMCSA's IT Strategic Planning and Oversight To Modernize Legacy Systems

The Government Accountability Office (GAO) [has issued](#) a report making five recommendations to the Federal Motor Carrier Safety Administration (FMCSA) to improve its IT strategic planning, oversight, and operational analyses. The FMCSA initiated a modernization effort in 2011 and developed an IT strategic plan to support the agency's mission. In December 2015, the Fixing America's Surface Transportation (FAST) Act was enacted and required GAO to review the agency's IT, data collection, and management systems. GAO's objectives were to assess the extent to which the agency has plans to modernize its existing systems, has implemented an IT governance structure, and has ensured selected IT systems are effective. The GAO recommended that the Secretary of Transportation should direct the FMCSA Administrator to 1) update FMCSA's IT strategic plan, 2) ensure that the IT investment process guidance lays out the roles and responsibilities of all working groups and individuals involved in the agency's governance process, 3) finalize the restructure of the Office of Information Technology, 4) ensure that appropriate governance bodies review all IT investments and track corrective actions to closure, and 5) ensure that required operational analyses are performed for Aspen, Motor Carrier Management Information System, Sentri 2.0, and Unified Registration System on an annual basis.

House Appropriation Draft Reduces Transportation Funding

The United States House of Representatives has released its \$56.5 billion Transportation – Housing and Urban Development FY 2018 appropriation request. The figures represent a 2 percent cut from the \$57.65 billion appropriated for FY 2017, but represents increases over the amounts proposed by the Trump administration. The bill would provide \$17.8 billion for the Transportation Department's discretionary budget. The appropriations request eliminates \$500 million dollars in funding for the Transportation Investment Generating Economic Recovery (TIGER) grant program and prohibits the use of funding for high speed rail in California. The bill would increase funding for the Federal Aviation

Administration (FAA) including requests that would fully fund the air traffic control technology overhaul program (NextGen) at \$1 billion.

Study Identifies Opportunities to Reduce Speeding-Related Deaths and Injuries

Although speeding is one of the most common factors in motor vehicle crashes in the US, it is an underappreciated problem, involved in about 10,000 highway fatalities each year according to the National Transportation Safety Board. More than 112,500 people died in speeding-related US highway crashes from 2005-2014. This is roughly equal to the number who died in alcohol-involved crashes over the same period. However, speeding gets far less attention. [Read more here.](#)

CDL Examiner Update Class

AAMVA will be conducting two Commercial Driver License (CDL) Examiner Update Classes the week of September 11th at Pinellas Technical College (PTC) in St. Petersburg, Florida. The class size is limited to 12 persons; and will be held as follows:

Class 1: Monday, September 11th thru Wednesday, September 13th

Class 2: Thursday, September 14th thru Saturday, September 16th

The class is designed to be a hands-on training class for experienced CDL Examiners or trainers. The class will focus on recent guidance provided by FMCSA related to CDL Classification/Endorsements & Restrictions, CDL Skills Test administration and scoring; and revisions to the CDL Test System. There is no tuition or registration fee for this training. All travel, room and board expenses will be paid by AAMVA. Nominees must have a thorough knowledge of the CDL program and current experience conducting CDL Skill Tests. Please submit completed [Nomination Forms](#) to Karen Morton via email at kmorton@aamva.org no later than **Friday, July 21, 2017**, as class sizes are limited. After the nominations are reviewed, detailed class and travel information will be sent to those persons selected to attend. If you have questions or need additional information, please contact Karen Morton at kmorton@aamva.org.

Nevada DMV Investigators Catch Federal Fugitive on the Run for 25 Years

A career criminal who turned violent after escaping federal custody and fleeing to Nevada has been brought back to justice. Robert Frederick Nelson, 64, of North Las Vegas, committed a string of violent felonies in Nevada after he escaped from a Minnesota federal prison in 1992. He is now back in federal custody following his arrest by investigators from the Nevada Department of Motor Vehicles' Compliance Enforcement Division. Nelson applied for a renewal of his Nevada identification card on June 5, 2017. Investigators withheld the card after the DMV's facial recognition system showed the same person had previously held a Nevada driver's license in the name of Craig James Pautler. Investigators found Nelson had a string of felony convictions under both names. He was arrested June 20 at the Decatur DMV office in Las Vegas on charges of failing to register as a felon and an outstanding traffic warrant. Fraud charges relating to the false identity of Craig Pautler were added later. [Read more here.](#)

NHTSA Requests Comment On Crash Risk Associated With Drug And Alcohol Use By Drivers In Injury Crashes ICR

The National Highway Traffic Safety Administration (NHTSA) [requests public comment](#) on a proposed collection of information (ICR) on "Crash Risk Associated With Drug And Alcohol Use By Drivers In Fatal And Serious Injury Crashes." NHTSA seeks to examine the risk of being severely injured in a motor vehicle crash when drivers use licit and illicit drugs. This effort will involve studying seriously or fatally injured drivers in crashes and matched non-crash-involved drivers. Participants will include seriously injured drivers who are transported to a trauma center by emergency medical services and fatally injured drivers transported directly to the medical examiner's office. Comments must be received on or before September 15, 2017.

NHTSA Requests Comment On Visual Scanning Training for Older Drivers ICR

The National Highway Traffic Safety Administration (NHTSA) [requests public comment](#) on a proposed collection of information (ICR) on "Visual Scanning Training for Older Drivers." The National Highway Traffic Safety Administration (NHTSA) proposes to collect information from licensed older drivers to determine (1) their eligibility to participate in a study of the effectiveness of a visual scanning training protocol to improve driving safety, (2) their attitudes about the training procedures and their perceptions of its benefits, and (3) the driving performance during on-road evaluations to measure training effectiveness. Comments must be received on or before September 15, 2017.

GAO Issues Report On FMCSA's IT Strategic Planning and Oversight To Modernize Legacy Systems

The Government Accountability Office (GAO) [has issued](#) a report making five recommendations to the Federal Motor Carrier Safety Administration (FMCSA) to improve its IT strategic planning, oversight, and operational analyses. The FMCSA initiated a modernization effort in 2011 and developed an IT strategic plan to support the agency's mission. In December 2015, the Fixing America's Surface Transportation (FAST) Act was enacted and required GAO to review the agency's IT, data collection, and management systems. GAO's objectives were to assess the extent to which the agency has plans to modernize its existing systems, has implemented an IT governance structure, and has ensured selected IT systems are effective. The GAO recommended that the Secretary of Transportation should direct the FMCSA Administrator to 1) update FMCSA's IT strategic plan, 2) ensure that the IT investment process guidance lays out the roles and responsibilities of all working groups and individuals involved in the agency's governance process, 3) finalize the restructure of the Office of Information Technology, 4) ensure that appropriate governance bodies review all IT investments and track corrective actions to closure, and 5) ensure that required operational analyses are performed for Aspen, Motor Carrier Management Information System, Sentri 2.0, and Unified Registration System on an annual basis.

House Appropriation Draft Reduces Transportation Funding

The United States House of Representatives has released its \$56.5 billion Transportation – Housing and Urban Development FY 2018 appropriation request. The figures represent a 2 percent cut from the \$57.65 billion appropriated for FY 2017, but represents increases over the amounts proposed by the Trump administration. The bill would provide \$17.8 billion for the Transportation Department's discretionary budget. The appropriations request eliminates \$500 million dollars in funding for the Transportation Investment Generating Economic Recovery (TIGER) grant program and prohibits the use of funding for high speed rail in California. The bill would increase funding for the Federal Aviation

Administration (FAA) including requests that would fully fund the air traffic control technology overhaul program (NextGen) at \$1 billion.

Study Identifies Opportunities to Reduce Speeding-Related Deaths and Injuries

Although speeding is one of the most common factors in motor vehicle crashes in the US, it is an underappreciated problem, involved in about 10,000 highway fatalities each year according to the National Transportation Safety Board. More than 112,500 people died in speeding-related US highway crashes from 2005-2014. This is roughly equal to the number who died in alcohol-involved crashes over the same period. However, speeding gets far less attention. [Read more here.](#)

NHTSA Requests Comment On Visual Scanning Training for Older Drivers ICR

The National Highway Traffic Safety Administration (NHTSA) [requests public comment](#) on a proposed collection of information (ICR) on "Visual Scanning Training for Older Drivers." The National Highway Traffic Safety Administration (NHTSA) proposes to collect information from licensed older drivers to determine (1) their eligibility to participate in a study of the effectiveness of a visual scanning training protocol to improve driving safety, (2) their attitudes about the training procedures and their perceptions of its benefits, and (3) the driving performance during on-road evaluations to measure training effectiveness. Comments must be received on or before September 15, 2017.

GAO Issues Report On FMCSA's IT Strategic Planning and Oversight To Modernize Legacy Systems

The Government Accountability Office (GAO) [has issued](#) a report making five recommendations to the Federal Motor Carrier Safety Administration (FMCSA) to improve its IT strategic planning, oversight, and operational analyses. The FMCSA initiated a modernization effort in 2011 and developed an IT strategic plan to support the agency's mission. In December 2015, the Fixing America's Surface Transportation (FAST) Act was enacted and required GAO to review the agency's IT, data collection, and management systems. GAO's objectives were to assess the extent to which the agency has plans to modernize its existing systems, has implemented an IT governance structure, and has ensured selected IT systems are effective. The GAO recommended that the Secretary of Transportation should direct the FMCSA Administrator to 1) update FMCSA's IT strategic plan, 2) ensure that the IT investment process guidance lays out the roles and responsibilities of all working groups and individuals involved in the agency's governance process, 3) finalize the restructure of the Office of Information Technology, 4) ensure that appropriate governance bodies review all IT investments and track corrective actions to closure, and 5) ensure that required operational analyses are performed for Aspen, Motor Carrier Management Information System, Sentri 2.0, and Unified Registration System on an annual basis.

House Appropriation Draft Reduces Transportation Funding

The United States House of Representatives has released its \$56.5 billion Transportation – Housing and Urban Development FY 2018 appropriation request. The figures represent a 2 percent cut from the \$57.65 billion appropriated for FY 2017, but represents increases over the amounts proposed by the Trump administration. The bill would provide \$17.8 billion for the Transportation Department's discretionary budget. The appropriations request eliminates \$500 million dollars in funding for the Transportation Investment Generating Economic Recovery (TIGER) grant program and prohibits the use of funding for high speed rail in California. The bill would increase funding for the Federal Aviation

Administration (FAA) including requests that would fully fund the air traffic control technology overhaul program (NextGen) at \$1 billion.

Study Identifies Opportunities to Reduce Speeding-Related Deaths and Injuries

Although speeding is one of the most common factors in motor vehicle crashes in the US, it is an underappreciated problem, involved in about 10,000 highway fatalities each year according to the National Transportation Safety Board. More than 112,500 people died in speeding-related US highway crashes from 2005-2014. This is roughly equal to the number who died in alcohol-involved crashes over the same period. However, speeding gets far less attention. [Read more here.](#)

Nevada DMV Investigators Catch Federal Fugitive on the Run for 25 Years

A career criminal who turned violent after escaping federal custody and fleeing to Nevada has been brought back to justice. Robert Frederick Nelson, 64, of North Las Vegas, committed a string of violent felonies in Nevada after he escaped from a Minnesota federal prison in 1992. He is now back in federal custody following his arrest by investigators from the Nevada Department of Motor Vehicles' Compliance Enforcement Division. Nelson applied for a renewal of his Nevada identification card on June 5, 2017. Investigators withheld the card after the DMV's facial recognition system showed the same person had previously held a Nevada driver's license in the name of Craig James Pautler. Investigators found Nelson had a string of felony convictions under both names. He was arrested June 20 at the Decatur DMV office in Las Vegas on charges of failing to register as a felon and an outstanding traffic warrant. Fraud charges relating to the false identity of Craig Pautler were added later. [Read more here.](#)

Nevada DMV Investigators Catch Federal Fugitive on the Run for 25 Years

A career criminal who turned violent after escaping federal custody and fleeing to Nevada has been brought back to justice. Robert Frederick Nelson, 64, of North Las Vegas, committed a string of violent felonies in Nevada after he escaped from a Minnesota federal prison in 1992. He is now back in federal custody following his arrest by investigators from the Nevada Department of Motor Vehicles' Compliance Enforcement Division. Nelson applied for a renewal of his Nevada identification card on June 5, 2017. Investigators withheld the card after the DMV's facial recognition system showed the same person had previously held a Nevada driver's license in the name of Craig James Pautler. Investigators found Nelson had a string of felony convictions under both names. He was arrested June 20 at the Decatur DMV office in Las Vegas on charges of failing to register as a felon and an outstanding traffic warrant. Fraud charges relating to the false identity of Craig Pautler were added later. [Read more here.](#)

Northeast States Receive Top Honors in National Competition

State department of transportation projects that greatly improved safety for transit commuters and revolutionized the way it collected tolls across an entire state are among the winners in the northeast regional [America's Transportation Awards](#) competition. Celebrating its 10th year, the competition attracted 19 project nominations from nine Northeast states. Eight projects from six of those states received top awards. Sponsored by AASHTO, AAA, and the U.S. Chamber of Commerce the competition recognizes transportation projects in three categories: Quality of Life/Community Development, Best Use of Technology and Innovation and new this year, Operations Excellence. NHTSA Requests Comment On Crash Risk Associated With Drug And Alcohol Use By Drivers In Injury Crashes ICR

The National Highway Traffic Safety Administration (NHTSA) [requests public comment](#) on a proposed collection of information (ICR) on "Crash Risk Associated With Drug And Alcohol Use By Drivers In Fatal And Serious Injury Crashes." NHTSA seeks to examine the risk of being severely injured in a motor vehicle crash when drivers use licit and illicit drugs. This effort will involve studying seriously or fatally injured drivers in crashes and matched non-crash-involved drivers. Participants will include seriously injured drivers who are transported to a trauma center by emergency medical services and fatally injured drivers transported directly to the medical examiner's office. Comments must be received on or before September 15, 2017.

NHTSA Requests Comment On Visual Scanning Training for Older Drivers ICR

The National Highway Traffic Safety Administration (NHTSA) [requests public comment](#) on a proposed collection of information (ICR) on "Visual Scanning Training for Older Drivers." The National Highway Traffic Safety Administration (NHTSA) proposes to collect information from licensed older drivers to determine (1) their eligibility to participate in a study of the effectiveness of a visual scanning training protocol to improve driving safety, (2) their attitudes about the training procedures and their perceptions of its benefits, and (3) the driving performance during on-road evaluations to measure training effectiveness. Comments must be received on or before September 15, 2017.

GAO Issues Report On FMCSA's IT Strategic Planning and Oversight To Modernize Legacy Systems

The Government Accountability Office (GAO) [has issued](#) a report making five recommendations to the Federal Motor Carrier Safety Administration (FMCSA) to improve its IT strategic planning, oversight, and operational analyses. The FMCSA initiated a modernization effort in 2011 and developed an IT strategic plan to support the agency's mission. In December 2015, the Fixing America's Surface Transportation (FAST) Act was enacted and required GAO to review the agency's IT, data collection, and management systems. GAO's objectives were to assess the extent to which the agency has plans to modernize its existing systems, has implemented an IT governance structure, and has ensured selected IT systems are effective. The GAO recommended that the Secretary of Transportation should direct the FMCSA Administrator to 1) update FMCSA's IT strategic plan, 2) ensure that the IT investment process guidance lays out the roles and responsibilities of all working groups and individuals involved in the agency's governance process, 3) finalize the restructure of the Office of Information Technology, 4) ensure that appropriate governance bodies review all IT investments and track corrective actions to closure, and 5) ensure that required operational analyses are performed for Aspen, Motor Carrier Management Information System, Sentri 2.0, and Unified Registration System on an annual basis.

House Appropriation Draft Reduces Transportation Funding

The United States House of Representatives has released its \$56.5 billion Transportation – Housing and Urban Development FY 2018 appropriation request. The figures represent a 2 percent cut from the \$57.65 billion appropriated for FY 2017, but represents increases over the amounts proposed by the Trump administration. The bill would provide \$17.8 billion for the Transportation Department's discretionary budget. The appropriations request eliminates \$500 million dollars in funding for the Transportation Investment Generating Economic Recovery (TIGER) grant program and prohibits the use of funding for high speed rail in California. The bill would increase funding for the Federal Aviation

Administration (FAA) including requests that would fully fund the air traffic control technology overhaul program (NextGen) at \$1 billion.

Study Identifies Opportunities to Reduce Speeding-Related Deaths and Injuries

Although speeding is one of the most common factors in motor vehicle crashes in the US, it is an underappreciated problem, involved in about 10,000 highway fatalities each year according to the National Transportation Safety Board. More than 112,500 people died in speeding-related US highway crashes from 2005-2014. This is roughly equal to the number who died in alcohol-involved crashes over the same period. However, speeding gets far less attention. [Read more here.](#)

CDL Examiner Update Class

AAMVA will be conducting two Commercial Driver License (CDL) Examiner Update Classes the week of September 11th at Pinellas Technical College (PTC) in St. Petersburg, Florida. The class size is limited to 12 persons; and will be held as follows:

Class 1: Monday, September 11th thru Wednesday, September 13th

Class 2: Thursday, September 14th thru Saturday, September 16th

The class is designed to be a hands-on training class for experienced CDL Examiners or trainers. The class will focus on recent guidance provided by FMCSA related to CDL Classification/Endorsements & Restrictions, CDL Skills Test administration and scoring; and revisions to the CDL Test System. There is no tuition or registration fee for this training. All travel, room and board expenses will be paid by AAMVA. Nominees must have a thorough knowledge of the CDL program and current experience conducting CDL Skill Tests. Please submit completed [Nomination Forms](#) to Karen Morton via email at kmorton@aamva.org no later than **Friday, July 21, 2017**, as class sizes are limited. After the nominations are reviewed, detailed class and travel information will be sent to those persons selected to attend. If you have questions or need additional information, please contact Karen Morton at kmorton@aamva.org.

Nevada DMV Investigators Catch Federal Fugitive on the Run for 25 Years

A career criminal who turned violent after escaping federal custody and fleeing to Nevada has been brought back to justice. Robert Frederick Nelson, 64, of North Las Vegas, committed a string of violent felonies in Nevada after he escaped from a Minnesota federal prison in 1992. He is now back in federal custody following his arrest by investigators from the Nevada Department of Motor Vehicles' Compliance Enforcement Division. Nelson applied for a renewal of his Nevada identification card on June 5, 2017. Investigators withheld the card after the DMV's facial recognition system showed the same person had previously held a Nevada driver's license in the name of Craig James Pautler. Investigators found Nelson had a string of felony convictions under both names. He was arrested June 20 at the Decatur DMV office in Las Vegas on charges of failing to register as a felon and an outstanding traffic warrant. Fraud charges relating to the false identity of Craig Pautler were added later. [Read more here.](#)

NHTSA Requests Comment On Crash Risk Associated With Drug And Alcohol Use By Drivers In Injury Crashes ICR

The National Highway Traffic Safety Administration (NHTSA) [requests public comment](#) on a proposed collection of information (ICR) on "Crash Risk Associated With Drug And Alcohol Use By Drivers In Fatal And Serious Injury Crashes." NHTSA seeks to examine the risk of being severely injured in a motor vehicle crash when drivers use licit and illicit drugs. This effort will involve studying seriously or fatally injured drivers in crashes and matched non-crash-involved drivers. Participants will include seriously injured drivers who are transported to a trauma center by emergency medical services and fatally injured drivers transported directly to the medical examiner's office. Comments must be received on or before September 15, 2017.

NHTSA Requests Comment On Visual Scanning Training for Older Drivers ICR

The National Highway Traffic Safety Administration (NHTSA) [requests public comment](#) on a proposed collection of information (ICR) on "Visual Scanning Training for Older Drivers." The National Highway Traffic Safety Administration (NHTSA) proposes to collect information from licensed older drivers to determine (1) their eligibility to participate in a study of the effectiveness of a visual scanning training protocol to improve driving safety, (2) their attitudes about the training procedures and their perceptions of its benefits, and (3) the driving performance during on-road evaluations to measure training effectiveness. Comments must be received on or before September 15, 2017.

GAO Issues Report On FMCSA's IT Strategic Planning and Oversight To Modernize Legacy Systems

The Government Accountability Office (GAO) [has issued](#) a report making five recommendations to the Federal Motor Carrier Safety Administration (FMCSA) to improve its IT strategic planning, oversight, and operational analyses. The FMCSA initiated a modernization effort in 2011 and developed an IT strategic plan to support the agency's mission. In December 2015, the Fixing America's Surface Transportation (FAST) Act was enacted and required GAO to review the agency's IT, data collection, and management systems. GAO's objectives were to assess the extent to which the agency has plans to modernize its existing systems, has implemented an IT governance structure, and has ensured selected IT systems are effective. The GAO recommended that the Secretary of Transportation should direct the FMCSA Administrator to 1) update FMCSA's IT strategic plan, 2) ensure that the IT investment process guidance lays out the roles and responsibilities of all working groups and individuals involved in the agency's governance process, 3) finalize the restructure of the Office of Information Technology, 4) ensure that appropriate governance bodies review all IT investments and track corrective actions to closure, and 5) ensure that required operational analyses are performed for Aspen, Motor Carrier Management Information System, Sentri 2.0, and Unified Registration System on an annual basis.

House Appropriation Draft Reduces Transportation Funding

The United States House of Representatives has released its \$56.5 billion Transportation – Housing and Urban Development FY 2018 appropriation request. The figures represent a 2 percent cut from the \$57.65 billion appropriated for FY 2017, but represents increases over the amounts proposed by the Trump administration. The bill would provide \$17.8 billion for the Transportation Department's discretionary budget. The appropriations request eliminates \$500 million dollars in funding for the Transportation Investment Generating Economic Recovery (TIGER) grant program and prohibits the use of funding for high speed rail in California. The bill would increase funding for the Federal Aviation

Administration (FAA) including requests that would fully fund the air traffic control technology overhaul program (NextGen) at \$1 billion.

Study Identifies Opportunities to Reduce Speeding-Related Deaths and Injuries

Although speeding is one of the most common factors in motor vehicle crashes in the US, it is an underappreciated problem, involved in about 10,000 highway fatalities each year according to the National Transportation Safety Board. More than 112,500 people died in speeding-related US highway crashes from 2005-2014. This is roughly equal to the number who died in alcohol-involved crashes over the same period. However, speeding gets far less attention. [Read more here.](#)

The FMCSA initiated a modernization effort in 2011 and developed an IT strategic plan to support the agency's mission. In December 2015, the Fixing America's Surface Transportation (FAST) Act was enacted and required GAO to review the agency's IT, data collection, and management systems. GAO's objectives were to assess the extent to which the agency has plans to modernize its existing systems, has implemented an IT governance structure, and has ensured selected IT systems are effective. The GAO recommended that the Secretary of Transportation should direct the FMCSA Administrator to 1) update FMCSA's IT strategic plan, 2) ensure that the IT investment process guidance lays out the roles and responsibilities of all working groups and individuals involved in the agency's governance process, 3) finalize the restructure of the Office of Information Technology, 4) ensure that appropriate governance bodies review all IT investments and track corrective actions to closure, and 5) ensure that required operational analyses are performed for Aspen, Motor Carrier Management Information System, Sentri 2.0, and Unified Registration System on an annual basis.

House Appropriation Draft Reduces Transportation Funding

The United States House of Representatives has released its \$56.5 billion Transportation – Housing and Urban Development FY 2018 appropriation request. The figures represent a 2 percent cut from the \$57.65 billion appropriated for FY 2017, but represents increases over the amounts proposed by the Trump administration. The bill would provide \$17.8 billion for the Transportation Department's discretionary budget. The appropriations request eliminates \$500 million dollars in funding for the Transportation Investment Generating Economic Recovery (TIGER) grant program and prohibits the use of funding for high speed rail in California. The bill would increase funding for the Federal Aviation

Administration (FAA) including requests that would fully fund the air traffic control technology overhaul program (NextGen) at \$1 billion.

Study Identifies Opportunities to Reduce Speeding-Related Deaths and Injuries

Although speeding is one of the most common factors in motor vehicle crashes in the US, it is an underappreciated problem, involved in about 10,000 highway fatalities each year according to the National Transportation Safety Board. More than 112,500 people died in speeding-related US highway crashes from 2005-2014. This is roughly equal to the number who died in alcohol-involved crashes over the same period. However, speeding gets far less attention. [Read more here.](#)

Nevada DMV Investigators Catch Federal Fugitive on the Run for 25 Years

A career criminal who turned violent after escaping federal custody and fleeing to Nevada has been brought back to justice. Robert Frederick Nelson, 64, of North Las Vegas, committed a string of violent felonies in Nevada after he escaped from a Minnesota federal prison in 1992. He is now back in federal custody following his arrest by investigators from the Nevada Department of Motor Vehicles' Compliance Enforcement Division. Nelson applied for a renewal of his Nevada identification card on June 5, 2017. Investigators withheld the card after the DMV's facial recognition system showed the same person had previously held a Nevada driver's license in the name of Craig James Pautler. Investigators found Nelson had a string of felony convictions under both names. He was arrested June 20 at the Decatur DMV office in Las Vegas on charges of failing to register as a felon and an outstanding traffic warrant. Fraud charges relating to the false identity of Craig Pautler were added later. [Read more here.](#)

NHTSA Requests Comment On Crash Risk Associated With Drug And Alcohol Use By Drivers In Injury Crashes ICR

The National Highway Traffic Safety Administration (NHTSA) [requests public comment](#) on a proposed collection of information (ICR) on "Crash Risk Associated With Drug And Alcohol Use By Drivers In Fatal And Serious Injury Crashes." NHTSA seeks to examine the risk of being severely injured in a motor vehicle crash when drivers use licit and illicit drugs. This effort will involve studying seriously or fatally injured drivers in crashes and matched non-crash-involved drivers. Participants will include seriously injured drivers who are transported to a trauma center by emergency medical services and fatally injured drivers transported directly to the medical examiner's office. Comments must be received on or before September 15, 2017.

Nevada DMV Investigators Catch Federal Fugitive on the Run for 25 Years

A career criminal who turned violent after escaping federal custody and fleeing to Nevada has been brought back to justice. Robert Frederick Nelson, 64, of North Las Vegas, committed a string of violent felonies in Nevada after he escaped from a Minnesota federal prison in 1992. He is now back in federal custody following his arrest by investigators from the Nevada Department of Motor Vehicles' Compliance Enforcement Division. Nelson applied for a renewal of his Nevada identification card on June 5, 2017. Investigators withheld the card after the DMV's facial recognition system showed the same person had previously held a Nevada driver's license in the name of Craig James Pautler. Investigators found Nelson had a string of felony convictions under both names. He was arrested June 20 at the Decatur DMV office in Las Vegas on charges of failing to register as a felon and an outstanding traffic warrant. Fraud charges relating to the false identity of Craig Pautler were added later. [Read more here.](#)

Northeast States Receive Top Honors in National Competition

State department of transportation projects that greatly improved safety for transit commuters and revolutionized the way it collected tolls across an entire state are among the winners in the northeast regional [America's Transportation Awards](#) competition. Celebrating its 10th year, the competition attracted 19 project nominations from nine Northeast states. Eight projects from six of those states received top awards. Sponsored by AASHTO, AAA, and the U.S. Chamber of Commerce the competition recognizes transportation projects in three categories: Quality of Life/Community Development, Best Use of Technology and Innovation and new this year, Operations Excellence. NHTSA Requests Comment On Crash Risk Associated With Drug And Alcohol Use By Drivers In Injury Crashes ICR

The National Highway Traffic Safety Administration (NHTSA) [requests public comment](#) on a proposed collection of information (ICR) on "Crash Risk Associated With Drug And Alcohol Use By Drivers In Fatal And Serious Injury Crashes." NHTSA seeks to examine the risk of being severely injured in a motor vehicle crash when drivers use licit and illicit drugs. This effort will involve studying seriously or fatally injured drivers in crashes and matched non-crash-involved drivers. Participants will include seriously injured drivers who are transported to a trauma center by emergency medical services and fatally injured drivers transported directly to the medical examiner's office. Comments must be received on or before September 15, 2017.

NHTSA Requests Comment On Visual Scanning Training for Older Drivers ICR

The National Highway Traffic Safety Administration (NHTSA) [requests public comment](#) on a proposed collection of information (ICR) on "Visual Scanning Training for Older Drivers." The National Highway Traffic Safety Administration (NHTSA) proposes to collect information from licensed older drivers to determine (1) their eligibility to participate in a study of the effectiveness of a visual scanning training protocol to improve driving safety, (2) their attitudes about the training procedures and their perceptions of its benefits, and (3) the driving performance during on-road evaluations to measure training effectiveness. Comments must be received on or before September 15, 2017.

GAO Issues Report On FMCSA's IT Strategic Planning and Oversight To Modernize Legacy Systems

The Government Accountability Office (GAO) [has issued](#) a report making five recommendations to the Federal Motor Carrier Safety Administration (FMCSA) to improve its IT strategic planning, oversight, and operational analyses. The FMCSA initiated a modernization effort in 2011 and developed an IT strategic plan to support the agency's mission. In December 2015, the Fixing America's Surface Transportation (FAST) Act was enacted and required GAO to review the agency's IT, data collection, and management systems. GAO's objectives were to assess the extent to which the agency has plans to modernize its existing systems, has implemented an IT governance structure, and has ensured selected IT systems are effective. The GAO recommended that the Secretary of Transportation should direct the FMCSA Administrator to 1) update FMCSA's IT strategic plan, 2) ensure that the IT investment process guidance lays out the roles and responsibilities of all working groups and individuals involved in the agency's governance process, 3) finalize the restructure of the Office of Information Technology, 4) ensure that appropriate governance bodies review all IT investments and track corrective actions to closure, and 5) ensure that required operational analyses are performed for Aspen, Motor Carrier Management Information System, Sentri 2.0, and Unified Registration System on an annual basis.

House Appropriation Draft Reduces Transportation Funding

The United States House of Representatives has released its \$56.5 billion Transportation – Housing and Urban Development FY 2018 appropriation request. The figures represent a 2 percent cut from the \$57.65 billion appropriated for FY 2017, but represents increases over the amounts proposed by the Trump administration. The bill would provide \$17.8 billion for the Transportation Department's discretionary budget. The appropriations request eliminates \$500 million dollars in funding for the Transportation Investment Generating Economic Recovery (TIGER) grant program and prohibits the use of funding for high speed rail in California. The bill would increase funding for the Federal Aviation

Administration (FAA) including requests that would fully fund the air traffic control technology overhaul program (NextGen) at \$1 billion.

Study Identifies Opportunities to Reduce Speeding-Related Deaths and Injuries

Although speeding is one of the most common factors in motor vehicle crashes in the US, it is an underappreciated problem, involved in about 10,000 highway fatalities each year according to the National Transportation Safety Board. More than 112,500 people died in speeding-related US highway crashes from 2005-2014. This is roughly equal to the number who died in alcohol-involved crashes over the same period. However, speeding gets far less attention. [Read more here.](#)

Nevada DMV Investigators Catch Federal Fugitive on the Run for 25 Years

A career criminal who turned violent after escaping federal custody and fleeing to Nevada has been brought back to justice. Robert Frederick Nelson, 64, of North Las Vegas, committed a string of violent felonies in Nevada after he escaped from a Minnesota federal prison in 1992. He is now back in federal custody following his arrest by investigators from the Nevada Department of Motor Vehicles' Compliance Enforcement Division. Nelson applied for a renewal of his Nevada identification card on June 5, 2017. Investigators withheld the card after the DMV's facial recognition system showed the same person had previously held a Nevada driver's license in the name of Craig James Pautler. Investigators found Nelson had a string of felony convictions under both names. He was arrested June 20 at the Decatur DMV office in Las Vegas on charges of failing to register as a felon and an outstanding traffic warrant. Fraud charges relating to the false identity of Craig Pautler were added later. [Read more here.](#)

NHTSA Requests Comment On Crash Risk Associated With Drug And Alcohol Use By Drivers In Injury Crashes ICR

The National Highway Traffic Safety Administration (NHTSA) [requests public comment](#) on a proposed collection of information (ICR) on "Crash Risk Associated With Drug And Alcohol Use By Drivers In Fatal And Serious Injury Crashes." NHTSA seeks to examine the risk of being severely injured in a motor vehicle crash when drivers use licit and illicit drugs. This effort will involve studying seriously or fatally injured drivers in crashes and matched non-crash-involved drivers. Participants will include seriously injured drivers who are transported to a trauma center by emergency medical services and fatally injured drivers transported directly to the medical examiner's office. Comments must be received on or before September 15, 2017.

NHTSA Requests Comment On Visual Scanning Training for Older Drivers ICR

The National Highway Traffic Safety Administration (NHTSA) [requests public comment](#) on a proposed collection of information (ICR) on "Visual Scanning Training for Older Drivers." The National Highway Traffic Safety Administration (NHTSA) proposes to collect information from licensed older drivers to determine (1) their eligibility to participate in a study of the effectiveness of a visual scanning training protocol to improve driving safety, (2) their attitudes about the training procedures and their perceptions of its benefits, and (3) the driving performance during on-road evaluations to measure training effectiveness. Comments must be received on or before September 15, 2017.

GAO Issues Report On FMCSA's IT Strategic Planning and Oversight To Modernize Legacy Systems

The Government Accountability Office (GAO) [has issued](#) a report making five recommendations to the Federal Motor Carrier Safety Administration (FMCSA) to improve its IT strategic planning, oversight, and operational analyses. The FMCSA initiated a modernization effort in 2011 and developed an IT strategic plan to support the agency's mission. In December 2015, the Fixing America's Surface Transportation (FAST) Act was enacted and required GAO to review the agency's IT, data collection, and management systems. GAO's objectives were to assess the extent to which the agency has plans to modernize its existing systems, has implemented an IT governance structure, and has ensured selected IT systems are effective. The GAO recommended that the Secretary of Transportation should direct the FMCSA Administrator to 1) update FMCSA's IT strategic plan, 2) ensure that the IT investment process guidance lays out the roles and responsibilities of all working groups and individuals involved in the agency's governance process, 3) finalize the restructure of the Office of Information Technology, 4) ensure that appropriate governance bodies review all IT investments and track corrective actions to closure, and 5) ensure that required operational analyses are performed for Aspen, Motor Carrier Management Information System, Sentri 2.0, and Unified Registration System on an annual basis.

House Appropriation Draft Reduces Transportation Funding

The United States House of Representatives has released its \$56.5 billion Transportation – Housing and Urban Development FY 2018 appropriation request. The figures represent a 2 percent cut from the \$57.65 billion appropriated for FY 2017, but represents increases over the amounts proposed by the Trump administration. The bill would provide \$17.8 billion for the Transportation Department's discretionary budget. The appropriations request eliminates \$500 million dollars in funding for the Transportation Investment Generating Economic Recovery (TIGER) grant program and prohibits the use of funding for high speed rail in California. The bill would increase funding for the Federal Aviation

Administration (FAA) including requests that would fully fund the air traffic control technology overhaul program (NextGen) at \$1 billion.

Study Identifies Opportunities to Reduce Speeding-Related Deaths and Injuries

Although speeding is one of the most common factors in motor vehicle crashes in the US, it is an underappreciated problem, involved in about 10,000 highway fatalities each year according to the National Transportation Safety Board. More than 112,500 people died in speeding-related US highway crashes from 2005-2014. This is roughly equal to the number who died in alcohol-involved crashes over the same period. However, speeding gets far less attention. [Read more here.](#)

House Appropriation Draft Reduces Transportation Funding

The United States House of Representatives has released its \$56.5 billion Transportation – Housing and Urban Development FY 2018 appropriation request. The figures represent a 2 percent cut from the \$57.65 billion appropriated for FY 2017, but represents increases over the amounts proposed by the Trump administration. The bill would provide \$17.8 billion for the Transportation Department's discretionary budget. The appropriations request eliminates \$500 million dollars in funding for the Transportation Investment Generating Economic Recovery (TIGER) grant program and prohibits the use of funding for high speed rail in California. The bill would increase funding for the Federal Aviation

Administration (FAA) including requests that would fully fund the air traffic control technology overhaul program (NextGen) at \$1 billion.

Study Identifies Opportunities to Reduce Speeding-Related Deaths and Injuries

Although speeding is one of the most common factors in motor vehicle crashes in the US, it is an underappreciated problem, involved in about 10,000 highway fatalities each year according to the National Transportation Safety Board. More than 112,500 people died in speeding-related US highway crashes from 2005-2014. This is roughly equal to the number who died in alcohol-involved crashes over the same period. However, speeding gets far less attention. [Read more here.](#)

Nevada DMV Investigators Catch Federal Fugitive on the Run for 25 Years

A career criminal who turned violent after escaping federal custody and fleeing to Nevada has been brought back to justice. Robert Frederick Nelson, 64, of North Las Vegas, committed a string of violent felonies in Nevada after he escaped from a Minnesota federal prison in 1992. He is now back in federal custody following his arrest by investigators from the Nevada Department of Motor Vehicles' Compliance Enforcement Division. Nelson applied for a renewal of his Nevada identification card on June 5, 2017. Investigators withheld the card after the DMV's facial recognition system showed the same person had previously held a Nevada driver's license in the name of Craig James Pautler. Investigators found Nelson had a string of felony convictions under both names. He was arrested June 20 at the Decatur DMV office in Las Vegas on charges of failing to register as a felon and an outstanding traffic warrant. Fraud charges relating to the false identity of Craig Pautler were added later. [Read more here.](#)

NHTSA Requests Comment On Crash Risk Associated With Drug And Alcohol Use By Drivers In Injury Crashes ICR

The National Highway Traffic Safety Administration (NHTSA) [requests public comment](#) on a proposed collection of information (ICR) on "Crash Risk Associated With Drug And Alcohol Use By Drivers In Fatal And Serious Injury Crashes." NHTSA seeks to examine the risk of being severely injured in a motor vehicle crash when drivers use licit and illicit drugs. This effort will involve studying seriously or fatally injured drivers in crashes and matched non-crash-involved drivers. Participants will include seriously injured drivers who are transported to a trauma center by emergency medical services and fatally injured drivers transported directly to the medical examiner's office. Comments must be received on or before September 15, 2017.

NHTSA Requests Comment On Visual Scanning Training for Older Drivers ICR

The National Highway Traffic Safety Administration (NHTSA) [requests public comment](#) on a proposed collection of information (ICR) on "Visual Scanning Training for Older Drivers." The National Highway Traffic Safety Administration (NHTSA) proposes to collect information from licensed older drivers to determine (1) their eligibility to participate in a study of the effectiveness of a visual scanning training protocol to improve driving safety, (2) their attitudes about the training procedures and their perceptions of its benefits, and (3) the driving performance during on-road evaluations to measure training effectiveness. GAO Issues Report On FMCSA's IT Strategic Planning and Oversight To Modernize Legacy Systems

The Government Accountability Office (GAO) [has issued](#) a report making five recommendations to the Federal Motor Carrier Safety Administration (FMCSA) to improve its IT strategic planning, oversight, and operational analyses. The FMCSA initiated a modernization effort in 2011 and developed an IT strategic plan to support the agency's mission. In December 2015, the Fixing America's Surface Transportation (FAST) Act was enacted and required GAO to review the agency's IT, data collection, and management systems. GAO's objectives were to assess the extent to which the agency has plans to modernize its existing systems, has implemented an IT governance structure, and has ensured selected IT systems are effective. The GAO recommended that the Secretary of Transportation should direct the FMCSA Administrator to 1) update FMCSA's IT strategic plan, 2) ensure that the IT investment process guidance lays out the roles and responsibilities of all working groups and individuals involved in the agency's governance process, 3) finalize the restructure of the Office of Information Technology, 4) ensure that appropriate governance bodies review all IT investments and track corrective actions to closure, and 5) ensure that required operational analyses are performed for Aspen, Motor Carrier Management Information System, Sentri 2.0, and Unified Registration System on an annual basis.

Before joining the Iowa DOT she was an appeals specialist for the Federal Emergency Management Agency. Melissa Spiegel graduated from the May 2015 Class of the [AAMVA Leadership Academy](#).

Nevada DMV Investigators Catch Federal Fugitive on the Run for 25 Years

A career criminal who turned violent after escaping federal custody and fleeing to Nevada has been brought back to justice. Robert Frederick Nelson, 64, of North Las Vegas, committed a string of violent felonies in Nevada after he escaped from a Minnesota federal prison in 1992. He is now back in federal custody following his arrest by investigators from the Nevada Department of Motor Vehicles' Compliance Enforcement Division. Nelson applied for a renewal of his Nevada identification card on June 5, 2017. Investigators withheld the card after the DMV's facial recognition system showed the same person had previously held a Nevada driver's license in the name of Craig James Pautler. Investigators found Nelson had a string of felony convictions under both names. He was arrested June 20 at the Decatur DMV office in Las Vegas on charges of failing to register as a felon and an outstanding traffic warrant. Fraud charges relating to the false identity of Craig Pautler were added later. [Read more here.](#)

Northeast States Receive Top Honors in National Competition

State department of transportation projects that greatly improved safety for transit commuters and revolutionized the way it collected tolls across an entire state are among the winners in the northeast regional [America's Transportation Awards](#) competition. Celebrating its 10th year, the competition attracted 19 project nominations from nine Northeast states. Eight projects from six of those states received top awards. Sponsored by AASHTO, AAA, and the U.S. Chamber of Commerce the competition recognizes transportation projects in three categories: Quality of Life/Community Development, Best Use of Technology and Innovation and new this year, Operations Excellence. NHTSA Requests Comment On Crash Risk Associated With Drug And Alcohol Use By Drivers In Injury Crashes ICR

The National Highway Traffic Safety Administration (NHTSA) [requests public comment](#) on a proposed collection of information (ICR) on "Crash Risk Associated With Drug And Alcohol Use By Drivers In Fatal And Serious Injury Crashes." NHTSA seeks to examine the risk of being severely injured in a motor vehicle crash when drivers use licit and illicit drugs. This effort will involve studying seriously or fatally injured drivers in crashes and matched non-crash-involved drivers. Participants will include seriously injured drivers who are transported to a trauma center by emergency medical services and fatally injured drivers transported directly to the medical examiner's office. Comments must be received on or before September 15, 2017.

NHTSA Requests Comment On Visual Scanning Training for Older Drivers ICR

The National Highway Traffic Safety Administration (NHTSA) [requests public comment](#) on a proposed collection of information (ICR) on "Visual Scanning Training for Older Drivers." The National Highway Traffic Safety Administration (NHTSA) proposes to collect information from licensed older drivers to determine (1) their eligibility to participate in a study of the effectiveness of a visual scanning training protocol to improve driving safety, (2) their attitudes about the training procedures and their perceptions of its benefits, and (3) the driving performance during on-road evaluations to measure training effectiveness. Comments must be received on or before September 15, 2017.

GAO Issues Report On FMCSA's IT Strategic Planning and Oversight To Modernize Legacy Systems

The Government Accountability Office (GAO) [has issued](#) a report making five recommendations to the Federal Motor Carrier Safety Administration (FMCSA) to improve its IT strategic planning, oversight, and operational analyses. The FMCSA initiated a modernization effort in 2011 and developed an IT strategic plan to support the agency's mission. In December 2015, the Fixing America's Surface Transportation (FAST) Act was enacted and required GAO to review the agency's IT, data collection, and management systems. GAO's objectives were to assess the extent to which the agency has plans to modernize its existing systems, has implemented an IT governance structure, and has ensured selected IT systems are effective. The GAO recommended that the Secretary of Transportation should direct the FMCSA Administrator to 1) update FMCSA's IT strategic plan, 2) ensure that the IT investment process guidance lays out the roles and responsibilities of all working groups and individuals involved in the agency's governance process, 3) finalize the restructure of the Office of Information Technology, 4) ensure that appropriate governance bodies review all IT investments and track corrective actions to closure, and 5) ensure that required operational analyses are performed for Aspen, Motor Carrier Management Information System, Sentri 2.0, and Unified Registration System on an annual basis.

House Appropriation Draft Reduces Transportation Funding

The United States House of Representatives has released its \$56.5 billion Transportation – Housing and Urban Development FY 2018 appropriation request. The figures represent a 2 percent cut from the \$57.65 billion appropriated for FY 2017, but represents increases over the amounts proposed by the Trump administration. The bill would provide \$17.8 billion for the Transportation Department's discretionary budget. The appropriations request eliminates \$500 million dollars in funding for the Transportation Investment Generating Economic Recovery (TIGER) grant program and prohibits the use of funding for high speed rail in California. The bill would increase funding for the Federal Aviation

Administration (FAA) including requests that would fully fund the air traffic control technology overhaul program (NextGen) at \$1 billion.

Study Identifies Opportunities to Reduce Speeding-Related Deaths and Injuries

Although speeding is one of the most common factors in motor vehicle crashes in the US, it is an underappreciated problem, involved in about 10,000 highway fatalities each year according to the National Transportation Safety Board. More than 112,500 people died in speeding-related US highway crashes from 2005-2014. This is roughly equal to the number who died in alcohol-involved crashes over the same period. However, speeding gets far less attention. [Read more here.](#)

CDL Examiner Update Class

AAMVA will be conducting two Commercial Driver License (CDL) Examiner Update Classes the week of September 11th at Pinellas Technical College (PTC) in St. Petersburg, Florida. The class size is limited to 12 persons; and will be held as follows:

Class 1: Monday, September 11th thru Wednesday, September 13th

Class 2: Thursday, September 14th thru Saturday, September 16th

The class is designed to be a hands-on training class for experienced CDL Examiners or trainers. The class will focus on recent guidance provided by FMCSA related to CDL Classification/Endorsements & Restrictions, CDL Skills Test administration and scoring; and revisions to the CDL Test System. There is no tuition or registration fee for this training. All travel, room and board expenses will be paid by AAMVA. Nominees must have a thorough knowledge of the CDL program and current experience conducting CDL Skill Tests. Please submit completed [Nomination Forms](#) to Karen Morton via email at kmorton@aamva.org no later than **Friday, July 21, 2017**, as class sizes are limited. After the nominations are reviewed, detailed class and travel information will be sent to those persons selected to attend. If you have questions or need additional information, please contact Karen Morton at kmorton@aamva.org.

Nevada DMV Investigators Catch Federal Fugitive on the Run for 25 Years

A career criminal who turned violent after escaping federal custody and fleeing to Nevada has been brought back to justice. Robert Frederick Nelson, 64, of North Las Vegas, committed a string of violent felonies in Nevada after he escaped from a Minnesota federal prison in 1992. He is now back in federal custody following his arrest by investigators from the Nevada Department of Motor Vehicles' Compliance Enforcement Division. Nelson applied for a renewal of his Nevada identification card on June 5, 2017. Investigators withheld the card after the DMV's facial recognition system showed the same person had previously held a Nevada driver's license in the name of Craig James Pautler. Investigators found Nelson had a string of felony convictions under both names. He was arrested June 20 at the Decatur DMV office in Las Vegas on charges of failing to register as a felon and an outstanding traffic warrant. Fraud charges relating to the false identity of Craig Pautler were added later. [Read more here.](#)

GAO Issues Report On FMCSA's IT Strategic Planning and Oversight To Modernize Legacy Systems

The Government Accountability Office (GAO) [has issued](#) a report making five recommendations to the Federal Motor Carrier Safety Administration (FMCSA) to improve its IT strategic planning, oversight, and operational analyses. The FMCSA initiated a modernization effort in 2011 and developed an IT strategic plan to support the agency's mission. In December 2015, the Fixing America's Surface Transportation (FAST) Act was enacted and required GAO to review the agency's IT, data collection, and management systems. GAO's objectives were to assess the extent to which the agency has plans to modernize its existing systems, has implemented an IT governance structure, and has ensured selected IT systems are effective. The GAO recommended that the Secretary of Transportation should direct the FMCSA Administrator to 1) update FMCSA's IT strategic plan, 2) ensure that the IT investment process guidance lays out the roles and responsibilities of all working groups and individuals involved in the agency's governance process, 3) finalize the restructure of the Office of Information Technology, 4) ensure that appropriate governance bodies review all IT investments and track corrective actions to closure, and 5) ensure that required operational analyses are performed for Aspen, Motor Carrier Management Information System, Sentri 2.0, and Unified Registration System on an annual basis.

House Appropriation Draft Reduces Transportation Funding

The United States House of Representatives has released its \$56.5 billion Transportation – Housing and Urban Development FY 2018 appropriation request. The figures represent a 2 percent cut from the \$57.65 billion appropriated for FY 2017, but represents increases over the amounts proposed by the Trump administration. The bill would provide \$17.8 billion for the Transportation Department's discretionary budget. The appropriations request eliminates \$500 million dollars in funding for the Transportation Investment Generating Economic Recovery (TIGER) grant program and prohibits the use of funding for high speed rail in California. The bill would increase funding for the Federal Aviation

Administration (FAA) including requests that would fully fund the air traffic control technology overhaul program (NextGen) at \$1 billion.

Study Identifies Opportunities to Reduce Speeding-Related Deaths and Injuries

Although speeding is one of the most common factors in motor vehicle crashes in the US, it is an underappreciated problem, involved in about 10,000 highway fatalities each year according to the National Transportation Safety Board. More than 112,500 people died in speeding-related US highway crashes from 2005-2014. This is roughly equal to the number who died in alcohol-involved crashes over the same period. However, speeding gets far less attention. [Read more here.](#)

The appropriations request eliminates \$500 million dollars in funding for the Transportation Investment Generating Economic Recovery (TIGER) grant program and prohibits the use of funding for high speed rail in California. The bill would increase funding for the Federal Aviation

Administration (FAA) including requests that would fully fund the air traffic control technology overhaul program (NextGen) at \$1 billion.

Study Identifies Opportunities to Reduce Speeding-Related Deaths and Injuries

Although speeding is one of the most common factors in motor vehicle crashes in the US, it is an underappreciated problem, involved in about 10,000 highway fatalities each year according to the National Transportation Safety Board. More than 112,500 people died in speeding-related US highway crashes from 2005-2014. This is roughly equal to the number who died in alcohol-involved crashes over the same period. However, speeding gets far less attention. [Read more here.](#)

Nevada DMV Investigators Catch Federal Fugitive on the Run for 25 Years

A career criminal who turned violent after escaping federal custody and fleeing to Nevada has been brought back to justice. Robert Frederick Nelson, 64, of North Las Vegas, committed a string of violent felonies in Nevada after he escaped from a Minnesota federal prison in 1992. He is now back in federal custody following his arrest by investigators from the Nevada Department of Motor Vehicles' Compliance Enforcement Division. Nelson applied for a renewal of his Nevada identification card on June 5, 2017. Investigators withheld the card after the DMV's facial recognition system showed the same person had previously held a Nevada driver's license in the name of Craig James Pautler. Investigators found Nelson had a string of felony convictions under both names. He was arrested June 20 at the Decatur DMV office in Las Vegas on charges of failing to register as a felon and an outstanding traffic warrant. Fraud charges relating to the false identity of Craig Pautler were added later. [Read more here.](#)

NHTSA Requests Comment On Crash Risk Associated With Drug And Alcohol Use By Drivers In Injury Crashes ICR

The National Highway Traffic Safety Administration (NHTSA) [requests public comment](#) on a proposed collection of information (ICR) on "Crash Risk Associated With Drug And Alcohol Use By Drivers In Fatal And Serious Injury Crashes." NHTSA seeks to examine the risk of being severely injured in a motor vehicle crash when drivers use licit and illicit drugs. This effort will involve studying seriously or fatally injured drivers in crashes and matched non-crash-involved drivers. Participants will include seriously injured drivers who are transported to a trauma center by emergency medical services and fatally injured drivers transported directly to the medical examiner's office. Comments must be received on or before September 15, 2017.

NHTSA Requests Comment On Visual Scanning Training for Older Drivers ICR

The National Highway Traffic Safety Administration (NHTSA) [requests public comment](#) on a proposed collection of information (ICR) on "Visual Scanning Training for Older Drivers." The National Highway Traffic Safety Administration (NHTSA) proposes to collect information from licensed older drivers to determine (1) their eligibility to participate in a study of the effectiveness of a visual scanning training protocol to improve driving safety, (2) their attitudes about the training procedures and their perceptions of its benefits, and (3) the driving performance during on-road evaluations to measure training effectiveness. Comments must be received on or before September 15, 2017.

GAO Issues Report On FMCSA's IT Strategic Planning and Oversight To Modernize Legacy Systems

The Government Accountability Office (GAO) [has issued](#) a report making five recommendations to the Federal Motor Carrier Safety Administration (FMCSA) to improve its IT strategic planning, oversight, and operational analyses. The FMCSA initiated a modernization effort in 2011 and developed an IT strategic plan to support the agency's mission. In December 2015, the Fixing America's Surface Transportation (FAST) Act was enacted and required GAO to review the agency's IT, data collection, and management systems. GAO's objectives were to assess the extent to which the agency has plans to modernize its existing systems, has implemented an IT governance structure, and has ensured selected IT systems are effective. The GAO recommended that the Secretary of Transportation should direct the FMCSA Administrator to 1) update FMCSA's IT strategic plan, 2) ensure that the IT investment process guidance lays out the roles and responsibilities of all working groups and individuals involved in the agency's governance process, 3) finalize the restructure of the Office of Information Technology, 4) ensure that appropriate governance bodies review all IT investments and track corrective actions to closure, and 5) ensure that required operational analyses are performed for Aspen, Motor Carrier Management Information System, Sentri 2.0, and Unified Registration System on an annual basis.

House Appropriation Draft Reduces Transportation Funding

The United States House of Representatives has released its \$56.5 billion Transportation – Housing and Urban Development FY 2018 appropriation request. The figures represent a 2 percent cut from the \$57.65 billion appropriated for FY 2017, but represents increases over the amounts proposed by the Trump administration. The bill would provide \$17.8 billion for the Transportation Department's discretionary budget. The appropriations request eliminates \$500 million dollars in funding for the Transportation Investment Generating Economic Recovery (TIGER) grant program and prohibits the use of funding for high speed rail in California. The bill would increase funding for the Federal Aviation

Administration (FAA) including requests that would fully fund the air traffic control technology overhaul program (NextGen) at \$1 billion.

Melissa Spiegel has been appointed Director of the Iowa Motor Vehicle Division. Spiegel has been serving as the interim Motor Vehicle Division director for the past six months, while also serving as director of Driver & Identification Services. She has been a member of the leadership teams for the Iowa DOT and the Motor Vehicle Division for the last three years, and has been with the Iowa DOT for seven years, starting as an administrative assistant 2 for records management in Driver & Identification Services and progressing to the Policy & Communications Officer for the Motor Vehicle Division and then director of Driver & Identification Services. She holds a Bachelor of Arts in Political Communication from the University of Northern Iowa and a Master of Public Administration from Drake University. Before joining the Iowa DOT she was an appeals specialist for the Federal Emergency Management Agency. Melissa Spiegel graduated from the May 2015 Class of the [AAMVA Leadership Academy](#).

Nevada DMV Investigators Catch Federal Fugitive on the Run for 25 Years

A career criminal who turned violent after escaping federal custody and fleeing to Nevada has been brought back to justice. Robert Frederick Nelson, 64, of North Las Vegas, committed a string of violent felonies in Nevada after he escaped from a Minnesota federal prison in 1992. He is now back in federal custody following his arrest by investigators from the Nevada Department of Motor Vehicles' Compliance Enforcement Division. Nelson applied for a renewal of his Nevada identification card on June 5, 2017. Investigators withheld the card after the DMV's facial recognition system showed the same person had previously held a Nevada driver's license in the name of Craig James Pautler. Investigators found Nelson had a string of felony convictions under both names. He was arrested June 20 at the Decatur DMV office in Las Vegas on charges of failing to register as a felon and an outstanding traffic warrant. Fraud charges relating to the false identity of Craig Pautler were added later. [Read more here.](#)

Northeast States Receive Top Honors in National Competition

State department of transportation projects that greatly improved safety for transit commuters and revolutionized the way it collected tolls across an entire state are among the winners in the northeast regional [America's Transportation Awards](#) competition. Celebrating its 10th year, the competition attracted 19 project nominations from nine Northeast states. Eight projects from six of those states received top awards. Sponsored by AASHTO, AAA, and the U.S. Chamber of Commerce the competition recognizes transportation projects in three categories: Quality of Life/Community Development, Best Use of Technology and Innovation and new this year, Operations Excellence. NHTSA Requests Comment On Crash Risk Associated With Drug And Alcohol Use By Drivers In Injury Crashes ICR

The National Highway Traffic Safety Administration (NHTSA) [requests public comment](#) on a proposed collection of information (ICR) on "Crash Risk Associated With Drug And Alcohol Use By Drivers In Fatal And Serious Injury Crashes." NHTSA seeks to examine the risk of being severely injured in a motor vehicle crash when drivers use licit and illicit drugs. This effort will involve studying seriously or fatally injured drivers in crashes and matched non-crash-involved drivers. Participants will include seriously injured drivers who are transported to a trauma center by emergency medical services and fatally injured drivers transported directly to the medical examiner's office. Comments must be received on or before September 15, 2017.

NHTSA Requests Comment On Visual Scanning Training for Older Drivers ICR

The National Highway Traffic Safety Administration (NHTSA) [requests public comment](#) on a proposed collection of information (ICR) on "Visual Scanning Training for Older Drivers." The National Highway Traffic Safety Administration (NHTSA) proposes to collect information from licensed older drivers to determine (1) their eligibility to participate in a study of the effectiveness of a visual scanning training protocol to improve driving safety, (2) their attitudes about the training procedures and their perceptions of its benefits, and (3) the driving performance during on-road evaluations to measure training effectiveness. Comments must be received on or before September 15, 2017.

GAO Issues Report On FMCSA's IT Strategic Planning and Oversight To Modernize Legacy Systems

The Government Accountability Office (GAO) [has issued](#) a report making five recommendations to the Federal Motor Carrier Safety Administration (FMCSA) to improve its IT strategic planning, oversight, and operational analyses. The FMCSA initiated a modernization effort in 2011 and developed an IT strategic plan to support the agency's mission. In December 2015, the Fixing America's Surface Transportation (FAST) Act was enacted and required GAO to review the agency's IT, data collection, and management systems. GAO's objectives were to assess the extent to which the agency has plans to modernize its existing systems, has implemented an IT governance structure, and has ensured selected IT systems are effective. The GAO recommended that the Secretary of Transportation should direct the FMCSA Administrator to 1) update FMCSA's IT strategic plan, 2) ensure that the IT investment process guidance lays out the roles and responsibilities of all working groups and individuals involved in the agency's governance process, 3) finalize the restructure of the Office of Information Technology, 4) ensure that appropriate governance bodies review all IT investments and track corrective actions to closure, and 5) ensure that required operational analyses are performed for Aspen, Motor Carrier Management Information System, Sentri 2.0, and Unified Registration System on an annual basis.

House Appropriation Draft Reduces Transportation Funding

The United States House of Representatives has released its \$56.5 billion Transportation – Housing and Urban Development FY 2018 appropriation request. The figures represent a 2 percent cut from the \$57.65 billion appropriated for FY 2017, but represents increases over the amounts proposed by the Trump administration. The bill would provide \$17.8 billion for the Transportation Department's discretionary budget. The appropriations request eliminates \$500 million dollars in funding for the Transportation Investment Generating Economic Recovery (TIGER) grant program and prohibits the use of funding for high speed rail in California. The bill would increase funding for the Federal Aviation

Administration (FAA) including requests that would fully fund the air traffic control technology overhaul program (NextGen) at \$1 billion.

Study Identifies Opportunities to Reduce Speeding-Related Deaths and Injuries

Although speeding is one of the most common factors in motor vehicle crashes in the US, it is an underappreciated problem, involved in about 10,000 highway fatalities each year according to the National Transportation Safety Board. More than 112,500 people died in speeding-related US highway crashes from 2005-2014. This is roughly equal to the number who died in alcohol-involved crashes over the same period. However, speeding gets far less attention. [Read more here.](#)

2017 Region I Conference Wraps Up

The [2017 Annual Region I Conference](#) wrapped up last week in Portland, Maine. All 321 attendees had several days of great networking opportunities and informative sessions.

The "Put a Lid on Cancer" charity event raised money for the Maine Medical Center Cancer Institute (MMCCI), Maine's leading provider of oncology services for adults and children. Before we add the fundraising event to our Region I history books, we have one last request of attendees. For those that donated and gave so generously online, we do not have our own record of your contribution. If you are comfortable doing so, and have not already done so, please forward a copy of your receipt to [Leslie Soares](#). We look forward to reporting the charity event totals to you!

The B56 conviction was loaded via ROOSC, so there is no linked withdrawal. The H7 reflects the single linkage of the U10 withdrawal and conviction that was loaded via the ROOSW.

So even though there is no linkage to the B56 conviction, do you still expect the CONVICTION ID CODE in the H3 to be populated?

I will see if I can get a fix out within the hour but realize it is getting close to the end of your day.

Gary,

Since the pointer is a CDL holder, you are required to provide a Med Self Certification Code:

ID	Clear Name and Identifier	Implementation Name	Validation		4.1	5.1	5.3	6.0
MED. XCHK. 200	Jurisdiction Code - Licensing (DDLJUR)	CLMF-DRIVER-LICENSE-JURIS Format=Alpha-numeric Size=2	If Jurisdiction Code - Licensing (DDLJUR) is in the "United States" list under Jurisdiction Code (BJUCDE) in Appendix D: Data Dictionary (on page 1871), and Driver License Commercial Status (DDLCTS) is 'LIC', Medical Self Certification Code (DDLST) is required.	HC			x	x
				HD			x	x
				HG			x	x
	Driver License Commercial Status (DDLCTS)	CLMF-DESC-CDL-STATUS Format=Alpha-numeric Size=3						
	Medical Self Certification Code (DDLST)	CLMF-MED-SELF-CERTIFICATION Format=Alpha-numeric Size=2

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

This time it appears the CSOR succeeded. I see the convictions, withdrawals and accident have been saved. CC has been sent and CE received.

I would like to run the CSOR first to be sure it doesn't have further problems. And then if possible, I'd like to go back to Driver D since those tests also deal with error processing. I could then address all of the issues at once.

Gary,

I was going through # C12 that was sent yesterday, I see that the error message, and Processing Status are being populated correctly, but, the HB message in error is not as per the SPEXS Specification.

Do you want to try the CSOR and come back and fix #C12 later ? Please let me know.

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Gary,

For the question you had on other standalone classes present such as a M (motorcycle) or R (snow machine), if there is no ID or DL, the answer is Yes – if a pointer exists, AK should respond.

I have copied our Lead BA, Ashish Regmi on the email, should you have any question.

Thanks,
Asma

Sure Gary,

We can continue with Driver D.

For the question you have, I will check internally and will let you know.

Replying on Driver D email chain.

Thanks,
Asma

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Thanks

The B56 conviction was loaded via ROOSC, so there is no linked withdrawal. The H7 reflects the single linkage of the U10 withdrawal and conviction that was loaded via the ROOSW.

So even though there is no linkage to the B56 conviction, do you still expect the CONVICTION ID CODE in the H3 to be populated?

I will see if I can get a fix out within the hour but realize it is getting close to the end of your day.

Gary,

Since the pointer is a CDL holder, you are required to provide a Med Self Certification Code:

ID	Clear Name and Identifier	Implementation Name	Validation		4.1	5.1	5.3	6.0
MED. XCHK. 200	Jurisdiction Code - Licensing (DDLJUR)	CLMF-DRIVER-LICENSE-JURIS Format=Alpha-numeric Size=2	If Jurisdiction Code - Licensing (DDLJUR) is in the "United States" list under Jurisdiction Code (BJUCDE) in Appendix D: Data Dictionary (on page 1871), and Driver License Commercial Status (DDLCTS) is 'LIC', Medical Self Certification Code (DDLST) is required.	HC			x	x
				HD			x	x
	Driver License Commercial Status (DDLCTS)	CLMF-DESC-CDL-STATUS Format=Alpha-numeric Size=3		HG			x	x
	Medical Self Certification Code (DDLST)	CLMF-MED-SELF-CERTIFICATION Format=Alpha-numeric Size=2

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

I would like to run the CSOR first to be sure it doesn't have further problems. And then if possible, I'd like to go back to Driver D since those tests also deal with error processing. I could then address all of the issues at once.

Gary,

I was going through # C12 that was sent yesterday, I see that the error message, and Processing Status are being populated correctly, but, the HB message in error is not as per the SPEXS Specification.

Do you want to try the CSOR and come back and fix #C12 later ? Please let me know.

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

The B56 conviction was loaded via ROOSC, so there is no linked withdrawal. The H7 reflects the single linkage of the U10 withdrawal and conviction that was loaded via the ROOSW.

So even though there is no linkage to the B56 conviction, do you still expect the CONVICTION ID CODE in the H3 to be populated?

Gary,

There are no errors on the HD message this time.

On the H3 message, for the B26 ACD conviction, CONVICTION ID CODE is blank.

Can you please look.

Thanks,
Asma

Asma, I've added the medical cert but see there is a bug with assigning the license class. The specified doc type = 9 exposed a problem with the class ranking logic.

I will see if I can get a fix out within the hour but realize it is getting close to the end of your day.

Gary,

Since the pointer is a CDL holder, you are required to provide a Med Self Certification Code:

ID	Clear Name and Identifier	Implementation Name	Validation		4.1	5.1	5.3	6.0
MED. XCHK. 200	Jurisdiction Code - Licensing (DDLJUR)	CLMF-DRIVER-LICENSE-JURIS Format=Alpha-numeric Size=2	If Jurisdiction Code - Licensing (DDLJUR) is in the "United States" list under Jurisdiction Code (BJUCDE) in Appendix D: Data Dictionary (on page 1871), and Driver License Commercial Status (DDLCTS) is 'LIC', Medical Self Certification Code (DDLST) is required.	HC			x	x
				HD			x	x
				HG			x	x
	Driver License Commercial Status (DDLCTS)	CLMF-DESC-CDL-STATUS Format=Alpha-numeric Size=3						
	Medical Self Certification Code (DDLST)	CLMF-MED-SELF-CERTIFICATION Format=Alpha-numeric Size=2

Since there was already a completed CSOR, I believe we need to take the following steps:

- I need to delete the pointer and remove the saved driver history
- Then I need to request a CSOR again
- The final CE response should be suppressed
- Then run C12.

Does that sound correct?

Yes, we can go back to Driver D. If that fix isn't present then I know we have a deploy issue.

Also, I have an unrelated question. Last week there was a fix to ensure inquiries returned the correct 'ranking' driver license credential information. You'll recall I was returning ID info when I should have returned basic DL info. Would you expect other standalone classes to be used if there is no ID or DL such as a M (motorcycle) or R (snow machine)?

Hi Asma,

I believe the Driver C CSOR problems from yesterday are resolved. I have deleted the pointer and am ready to issue the UD again for test C11. Let me know when you are ready.

There must be a problem on my side because the license number used to apply all of the history components comes from the originally sent UD. So the H* license should be irrelevant regardless if the it is correct or not.

I'm investigating.

Ok, earlier I noticed that on the H* messages, there was an extra 'P3' and corrected that but now the license number is good and not sure why you are receiving the error, let me look. I think you would receive the P3 license number on the H*. Could you please take a look as well?

Thank you

Sent the UD and received the history messages; however, the same problem occurred where the P3 license number is being sent. I've attached the hd message.

There seems to be a problem with the received history messages (HD, H3, etc). They identify 'P3DRIVERCSTRUCTURED1366' as the jurisdiction license number. Hence, they were not saved although the process resulted in a CC and subsequent confirmation.

Good Morning Gary,

I think since the issue is fixed, we can complete Driver C and then move on to Driver D. I sent C12 and it looked good, please go ahead with completing the CSOR by sending the CC message for C11.

Thank you,
Siri.

Siri, we left off at D2 and can continue when you're ready.

We also have not finished Driver C. I believe we left off at C12 if you'd rather pick up from there.

Hi Asma,

Sorry for the long delay. We've come up with a more streamlined deployment approach. Going forward I should be able to apply fixes much faster.

None the less, I'm applying the latest fixes now so we'll need to pick this up again in the morning.

Thanks
Gary
